Letter from the Director...

Domestic violence has an incredible impact on our society, as it not only impacts victims and their families and extended families, but the lives of first responders, advocates, therapists, EMS and other medical providers who over time, battle the possible effects of secondary trauma. Additionally, the lives of police officers and others associated with the victim (and sometimes not associated) are many times threatened by a violent abuser, as well. Indeed, many lives have been lost at the hands of domestic-violence offenders.

In truth, domestic violence has an impact on the quality of life for all of us. The physical, emotional, and mental health costs to victims and their families as a result of domestic violence are devastating and have been well documented. The financial costs of domestic violence are extremely hard to quantify, both in direct and indirect costs, but estimates are staggering. In a 2003 study published by the Department of Health and Human Services, the cost of domestic violence against women alone in the U.S. was estimated to be greater than \$5.8 billion annually<sup>1</sup>. That equals \$7.9 billion today. Ultimately, all the resources that are devoted to respond to domestic violence, from the many disciplines that must deal with the fallout from these crimes, are resources not used to improving necessary elements of community life that provide for a quality of life for its residents: schools, infrastructure, transportation services, services for those with disabilities, recreational services, the environment, etc..

At a time in our country when civil discourse seems so toxic, we must remember that what we say and do is being absorbed by our children. If we want the next generation to learn self-respect and the value of having respect for others (even when we disagree), we must model that behavior in our own lives. It is no mistake that violence in adult relationships starts in the behavior of the young who are not shown respectful ways to speak, honorable ways to treat others with dignity, and healthy, appropriate ways to resolve differences. Mastering these lessons are imperative if we hope to prevent future violence in relationships among human beings.

This report presents domestic violence data from the Central Repository from statewide law enforcement agencies, service provider agencies, and district and magistrate courts, which demonstrate the prevalence of domestic violence in our state, and as earlier discussed, the enormous response required to address it.

As we are all directly and/or indirectly affected by this pervasive social problem, on behalf of myself and the Office of Injury Prevention, we thank you for your part in modeling respectful behavior and putting yourself on the front lines to make a positive difference in our lives.

Sincerely,

Betty Caponera, Ph.D.  
Director

# Domestic Violence in New Mexico 2017 Highlights

Betty Caponera, Ph.D.  
July 2017

Funded by the State of New Mexico, Department of Health, Office of Injury Prevention

## I. INTRODUCTION

Data sources for this report include aggregate domestic violence data from statewide law enforcement and service provider agencies and individual data from district and magistrate courts provided by the Administrative Office of the Courts (AOC). All data were submitted to the New Mexico Interpersonal Violence Data Central Repository for calendar year 2017. Additionally, findings and implications from the Adult Survivor Database (referenced in appendix A), the Albuquerque SANE Collaborative Domestic Violence data, the National Intimate Partner and Sexual Violence Survey, 2010 Summary, and the 2010-2012 NISVS State Report are included to inform domestic violence prevention and system response.

## II. SUMMARY OF FINDINGS

### A. Domestic And Intimate Partner Violence Prevalence

In 2017, there were 19,234 domestic violence incidents reported to statewide law enforcement agencies, a 3% decrease from that reported in 2016 (19,746).

Nationally, the *National Intimate Partner and Sexual Violence Survey* (NISVS) found that 1 in 4 women in the U.S. has experienced severe physical violence by an intimate partner in her lifetime, and 1 in 3 experienced being pushed, slapped or shoved by an intimate partner. Similarly, the NISVS found that 1 in 7 men in the U.S. has experienced severe physical violence by an intimate partner in his lifetime, and 1 in 4 has been slapped, pushed or shoved by an intimate partner. (Black, Basile, et al, [NISVS] 2011).

Nationally, in the 12-month period prior to the NISVS, 4.5% of men were victims of intimate partner physical violence, 2.0% victims of severe physical violence. Similarly, the NISVS reported that 3.6% of women were victims of intimate partner physical violence, 2.7% victims of severe physical violence.

### B. Stalking Prevalence

In 2017, statewide law enforcement agencies identified 1,303 victims of harassment and 145 stalking victims. There were 287 new stalking and aggravated stalking cases filed in statewide district and magistrate courts. Stalking continues to be grossly undocumented by law enforcement as all other sources of data show considerable stalking prevalence nationally and in the New Mexico population.

Nationally, in 2010, the NISVS found that 1 in 6 (15.8%) women and 1 in 19 (5.3%) men have experienced stalking in their lifetime, compared to 19.0% of women and 6.1% of men in New Mexico who have experienced stalking in their lifetime.

Nationally in the 12-month period preceding the NISVS, 4% of adult women and 1.3% of adult men were victims of stalking. There is not a statistically reliable 12-month estimate for women and men in New Mexico. However, if we used the national annual rate to estimate the number of women stalking victims in New Mexico in 2012, it would mean that there were an estimated 33,610 women stalking victims that year (800,247 women [18 and over] x 4.2%). It is interesting to note that statewide law enforcement agencies in 2012 reported a total of 68 stalking cases, regardless of gender.

### **C. Victim Demographics**

Approximately three-quarters (71%) of the domestic violence victims identified by law enforcement were female. Ninety-two percent of the adult-victims served by domestic violence service providers were female.

New Mexico victims of domestic violence, as reported by law enforcement, were predominantly 19-45 years old (62%). Black survivors (5%) and Native American survivors (13%) are represented significantly more among victims than their representation in the state population (2.5% and 10.9%, respectively). Similarly, adult victims, as reported by domestic violence service providers, were predominantly 22-40 years old (61%) and Hispanic (51%).

### **D. Suspect Demographics**

Suspects, as reported by law enforcement, were predominantly male (73%), Hispanic (52%), and 19-45 years of age (77%). Offenders, as reported by domestic violence service providers, were predominantly male (79%), Hispanic (48%) and 22-40 years of age (66%).

Nationally, the National Crime Victimization Survey (NCVS) found that 95.7% of female victims of non-fatal intimate partner violence were victimized by a male, 3.1% were victimized by a female, and 1.2% victimized by both a male and female. (Catalano, S. Intimate Partner Violence in the United States, BJS, 2007).

### **E. Children Victim-Witnesses**

Of 14,446 law enforcement reports that documented the number of incidents with children present at the scene, there were 4,324 (30%) incidents where at least one child was present.

There were a total of 6,718 total children present at the scene of domestic violence incidents as reported by law enforcement, and two-thirds (66%) of the children who witnessed these incidents were not yet adolescents (12 years and under).

There were 5,310 domestic violence service provider reports that identified 1,587 (30%) domestic violence incidents where children were present at the scene, or at least one child witness for every three incidents. Over three-quarters (79%) of children victim-witnesses served are under age 12.

Nationally, the NCVS found children were residents in the household of an average 38% each year of incidents of intimate partner violence involving female victims and an average 21% of incidents involving male victims. (Catalano, 2007).

In New Mexico, 23% of children victim-witnesses, as reported by domestic violence service providers, experienced physical abuse from the current offender of the adult victim, and 7% experienced sexual abuse from the current offender of the adult victim.

## **F. Offense Characteristics**

### **1. Alcohol/Drug Use Incidence**

Approximately one-quarter (27%) of domestic violence cases reported by law enforcement identified alcohol/drug use. Alcohol/drugs were used by 20% of victims served by domestic violence service providers. Half (68%) of offenders of the victims served by statewide providers used alcohol/drugs at the time of the domestic violence incident. Nationally, nearly half the female victims of intimate violence reported that the offender was drinking or using illegal drugs at the time of the crime. (Criminal Victimization, 2011 [NCVS, 2010])

### **2. Weapon Incidence**

A weapon was used in 58% of domestic violence cases reported by law enforcement and 22% of the cases reported by victims served by domestic violence service providers. The large disparity between weapon-related assaults in domestic violence cases reported by law enforcement and victims may be explained in part, by a difference in perception between the two parties regarding what constitutes a weapon. Police officers, guided by state statute, regard the use of fists, feet, elbows, etc., as “personal weapons”. Victims may define weapons as objects other than those defined as “personal weapons” such as a bat, gun, knife, etc.

In 2010, the NCVS reported that a weapon was used in 22% of all violent victimizations, 61% of serious violent victimizations, and 20% of aggravated and simple assaults (Criminal Victimization, 2011 [NCVS, 2010]). Six percent of all assaults involved a firearm, 4% involved a knife, and 8% involved “other” weapons.

### **3. Injury Incidence**

Forty-one percent of law enforcement-reported domestic violence cases involved injury to the victim. Similarly, 38% of adult victims served by domestic violence service providers reported being physically injured from the domestic assault. Nationally, in 2010, the NCVS reported that 29% of all victims of violence suffered an injury; and that 41% of victims of serious violence suffered an injury.

### **4. Victim/Offender Relationship**

*Current or former intimate partner* described the victim/offender relationship of 65% of law enforcement-reported domestic violence cases and 82% of domestic violence cases reported by service providers in 2017. In 2010, the NCVS reported that 64% of reported and unreported domestic violence victimizations involved an intimate partner (current or former spouse, boyfriend or girlfriend) (Criminal Victimization, 2011 [NCVS, 2010]).

### **5. Interpersonal Violence Reported to Law Enforcement**

In 2017, 55% of domestic violence victims who went for help reported their victimization incident to law enforcement. Nationally, half of all violent victimizations were reported to law enforcement (Criminal Victimization, 2011 [NCVS, 2010]).

## **6. Rates of Suspect Arrest**

In 2017, 38% of domestic violence incidents reported by law enforcement resulted in a suspect arrest.

## **G. Domestic Violence And The Courts**

### **1. Protection Orders**

In 2017, there were 11,872 protection orders issued by statewide district courts for one or more parties involved in 6,958 domestic-violence related protection order cases. Of the 11,872 protection orders issued, 2% (221) were emergency protection orders, 75% (8,927) were domestic violence temporary orders of protection, and 23% (2,724) were judgments for permanent protection orders.

The ASD revealed that half (49%) of domestic violence survivors obtained a protection order for the most recent domestic violence incident. Of the 628 survivors involved in a prior domestic violence incident as an adult, 20% (125) obtained an order of protection. With regard to prior domestic violence events, more females (20%) than males (12%) reported obtaining a protection order.

### **2. New Domestic Violence Charges Filed**

Overall in 2017, there were 17,232 new domestic violence charges filed in 13,632 new cases in statewide district and magistrate courts, including the Bernalillo County Metropolitan Court. This represents 71% of the total number of domestic violence cases reported by law enforcement for the same time period (19,234).

There were a total of 14,500 domestic violence charges filed in 11,902 new cases of domestic violence in New Mexico Magistrate Courts in 2017; and 2,732 domestic violence charges filed in 1,956 new cases of domestic violence in New Mexico District Courts in 2017. All cases/charges are against a household member: battery, aggravated battery, and false imprisonment comprised most of the charges filed in both courts.

### **3. Domestic Violence Cases Disposed in Magistrate Courts**

Of the 12,107 cases of domestic violence disposed in magistrate courts in 2017, 8% (975) obtained a guilty plea/conviction, 1% (68) obtained an acquittal, 79% (9,474) were dismissed, and 12% (1,490) had prosecution proceedings that resulted in “other” dispositions (bind over cases, transfers, deferred cases, and conditional discharges).

### **4. Domestic Violence Cases Disposed in District Courts**

Of the 1,956 cases of domestic violence disposed in district courts in 2017, 29% (565) obtained a guilty plea/conviction, <1% (19) obtained an acquittal, 54% (1,065) were dismissed, and 16% (307) had prosecution proceedings that resulted in “other” dispositions (conditional discharges, remands, consent decrees, and deferred cases).

### III. IMPLICATIONS OF THE FINDINGS AND FUTURE DATA NEEDS

#### A. Identifying Children at Risk

Service providers reported that children were present at one out of every 3.3 domestic violence incidents in 2017, and 79% of them were under the age of twelve. The ASD revealed that children who witness abuse are four times more likely to experience child abuse, than children who do not witness abuse. It further found that most (62%) abused children experienced multiple types of abuse, most typically at the hands of a family member (84%); and those abused as children have poorer health outcomes. Survivors abused as children compared to those not abused were six times more likely to be abused as an adult, four times more likely respectively, to be told they have a mental illness and attempt suicide, and three times more likely respectively, to think about suicide and be told they have a substance abuse problem. The children served by statewide service providers (2,789) represent 41.5% of the number present at the scene of domestic violence incidents as reported by law enforcement (6,718). These numbers represent only children in domestic violence cases that are reported. With so much at stake, it is imperative that greater effort be made (protocols for coordinated community response and systems in place) to better identify children that witness child abuse and ensure participation in appropriate counseling services for assessment and treatment.

#### B. Poverty and Violence

Most of the battered women who go to a domestic violence service provider for shelter and/or other services are poor. Since there is no way to capture the number of survivors with financial means who access private services, and/or who travel out of state for services, it is not possible to determine the true proportion of survivors among all battered women who are poor. However, the ASD found that most unmarried survivors with children and those without children who went for domestic violence services in New Mexico meet federal poverty level requirements for 150% and 133% of income, as well as the more restrictive federal poverty income level.

Almost two-thirds (60%) of survivors reported that they left a violent relationship at some time. Of these, one-third (32%) reported that they returned. Reasons for returning to their abuser in the order of most mentions include, returned: *to try to work it out, for the children, and because I was scared*. A central core of the consideration for returning “for the children” is finances. Among the descriptions for scared is “no support/lack of resources”. Indeed, the ASD revealed that survivors who left a violent relationship and did not return had a median annual income \$2,080 greater (\$12,000) than those who left and returned (\$9,920). It further found that only 42% of survivors who are eligible/receive Medicaid/TANF assistance live in their own apartment or home. Most live in shelter (23%), with a friend (29%), transitional housing (1%), or on the street (3%).

Of survivors who were involved in a prior domestic violence experience, 43% reported that they live with an offender with whom they have had a prior domestic violence incident. When examined by income, survivors who live with an offender with whom they have had a prior domestic violence experience had a median annual income of \$2,400 less (\$9,600) than survivors who do not live with an offender with whom they have had a prior domestic violence experience (\$12,000).

All of this points to the reality of the role that poverty plays in an individual’s vulnerability to living in violence. Greater emphasis must be pointed toward providing basic housing, food, clothing, transportation, and access to employment and health care for victims and their families to allow them to leave and stay away from a violent environment.

### **C. Mental Illness and Health and Safety Risk**

Survivors with a parent with mental illness were twelve times more likely than other survivors to be told they have mental illness. Survivors with mental illness were five times more likely than survivors without to be told they have a substance abuse problem and two times more likely respectively, to have used alcohol/drugs during a domestic violence incident and to be injured during a violent incident. These data have implications for investigating the plausibility of developing a system for at-scene referral to mental health agencies to evaluate survivors for mental illness, both for their own sake, and the sake of their children's future health and safety.

### **D. Injury Risk Factors**

Law enforcement agencies reported that 41% of the domestic violence incidents in 2017 involved injury to the victim. They do not document or report injury to children. Service providers reported that 38% of survivors and 23% of children were injured in domestic violence cases that came to their attention.

From the ASD, among the types of abuse reported by the 89% of survivors who reported abuse by an intimate partner, are *physical attack* (60%), *physical restraint* (29%), *threatened to be harmed or killed* (34%), *strangulation* (12%), *sexual assault* (11%) and *involvement of a lethal weapon* (12%). Twenty percent of children present during these abusive incidents suffered the same types of abuse.

The ASD revealed that survivor risk of injury increased among survivors: a) with a substance abuse problem; b) with a mental illness; c) involved in a prior domestic violence incident; d) ever abused while pregnant; e) who are female; or f) who are Native American. This information has implications for law enforcement for assessing risk of harm to the survivor and children at the scene, and for service providers when developing safety plans with survivors.

### **E. Substance Abuse and Risk**

As with mental illness, survivors who were told they have a substance abuse problem compared to those without, were two times more likely respectively, to have used alcohol/drugs during a domestic violence incident, to be involved in an incident where the abuser used alcohol/drugs, and to be injured during a domestic violence incident. Additionally, survivors with an substance abuse problem were two times more likely than those without a substance abuse problem to think about suicide, and four times more likely to attempt suicide. This information has implications for providing access to substance abuse treatment for survivors.

### **F. Evidence Supporting the Focus on Early Intervention to Prevent Domestic Violence**

In 2017, two-thirds (65%) of the law enforcement incidents documenting the victim/offender relationship, were perpetrated by a current or former intimate partner, 48% of these by current or former boyfriends/girlfriends who are or were dating or living together. Similarly, 82% of adult victims who sought services from a domestic violence service provider were assaulted by a current or former intimate partner, 30% of these were dating or living together. The NISVS State Report found that 37.3% of women and 33.3% of men in New Mexico were victims of intimate partner violence in their lifetime. Further, nationally 7.1% of women who were lifetime victims of intimate partner violence and 3.7% of men who were lifetime victims of intimate partner violence were victimized before age 18. In New Mexico, 6.9% of women lifetime victims of intimate partner violence were victimized before age 18. Further, stalking behaviors begin in adolescence and the reported incidence of adolescent stalking is almost twice that of

adolescent intimate partner violence. The high proportion of interpersonal violence cases perpetrated by adolescent offenders, demonstrates that true prevention requires early education initiatives on building healthy relationships during adolescence.

### **G. Sexual Assault Prevention and Treatment for Domestic Violence Child and Adult Victims**

In 2012, the ASD found many children experienced sexual abuse (8%) at the hands of their adult-victim's offender. Similarly in 2017, 17% of adult domestic violence victims seeking counseling services and 7% of children were sexually assaulted by their offender.

The NISVS State Report reported that 16.5% of women in New Mexico that were ever victims of intimate partner violence, experienced contact sexual violence (rape and/or unwanted sexual contact) by their intimate partner. This suggests that effective prevention and treatment programs for domestic violence victims must include components of sexual assault prevention and treatment or must provide referrals to appropriate sexual assault services.

### **H. Interpersonal Violence Prevention and Advocacy for Males**

In New Mexico in 2017, 29% of domestic violence victims identified by law enforcement were males. The NISVS State Report found that 33.3% of New Mexico men were victims of intimate partner violence in their lifetime. More outreach must be done to identify male victims of interpersonal violence and offer prevention and treatment programs specific to males.

### **I. Providing Offender Treatment Programs**

In New Mexico, 73% of suspects identified by law enforcement and 79% of offenders identified by domestic violence service providers in 2017, were male. Nationally, the NCVS found that 95.7% of female victims of intimate partner violence and 16% of male victims of intimate partner violence, had a male offender (Criminal Victimization, 2011). Further, findings from the NISVS State Report revealed that in 84.8% of lifetime stalking victimizations with female victims and 43% of lifetime stalking victimizations with male victims had a male offender. Perhaps greater outcomes in domestic violence prevention may be realized through greater availability of offender prevention and therapeutic programs that include strategies for addressing aggression in male socialization.

### **J. Evidence Supporting the Need to Identify Domestic Violence Victims in the Healthcare Setting**

In 2017, law enforcement reported that 41% of adult victims were physically injured during a domestic violence incident. Similarly, statewide service providers reported that 38% of adults and 23% of children were physically injured by the adult victim's offender during a domestic violence incident. The NISVS State Report stated that an average 30.8% of women victims of intimate partner violence and 13.4% of men victims of intimate partner violence each year nationally, were injured. Additionally, an average 15.3% of women and 6.2% of men each year required medical care for their injuries. This suggests that New Mexico healthcare facilities may play an important role in both, the identification of domestic violence victims and their referral to appropriate services.

Patients that are seen in the healthcare/emergency room setting with a domestic violence-related injury are typically not reported to law enforcement and represent a substantial gap in reporting. While many healthcare facilities use screening tools to identify patients who are victims of domestic violence,

no standardized monitoring system to reliably document the number of these individuals currently exists. Methods to determine healthcare utilization by victims of violence through e-codes or billing databases have been unsuccessful and are unreliable at best, due to definitional problems of the codes, practitioner discretion and inconsistencies in naming injuries, and the insurance-related intentions of billing databases. The need to rectify these problems is underscored by findings from the NISVS State Report which revealed substantial co-morbidity with intimate partner violence victims with regard to chronic physical and mental health problems. Among women victims of intimate partner violence, 6.2% reported poor physical health compared to 3.0% of women with no history of violence. Similarly, among women victims of intimate partner violence, 3.6% reported poor mental health compared to 1.1% of women with no history of violence.

The process for collecting standardized domestic violence data from statewide medical facilities is not yet established. Since many times the first, and perhaps only contact a victim may have with the "helping system" is through a hospital emergency department or physicians' office, this creates a significant void in the Central Repository data and represents a major obstacle in accurately defining the scope and nature of domestic violence in our state. Moreover, until better protocols are established for identifying patient visits associated with interpersonal violence, a significant portion of the total cost of interpersonal violence to individuals, their communities, and the state cannot be estimated.

#### **K. Evidence Supporting the Need for Culturally Competent Services for Native Americans**

Native Americans are nearly three times (11%) more represented among the victimized population of domestic violence survivors served at Albuquerque SANE than their representation in the Bernalillo County population (3.9%). This rate of victimization-representation to population-representation is greater than all other non-multiracial persons: Blacks (2.0 times); Hispanics (1.2 times); White [non-Hispanics] (-1.68 times); and other race/ethnicity (1.0 times). This is consistent with the NISVS State Report finding that intimate partner victimizations of Native American women were significantly more represented than other races/ethnicities in the victimized population of lifetime intimate partner violence nationally. A reported 47.5% of American Indian/Alaska Native women, 45.1% of non-Hispanic Black women, 37.3% of non-Hispanic White women, 34.4% of Hispanic women, and 18.3% of non-Hispanic Asian or Pacific Islander women experienced intimate partner violence in their lifetime.

The NISVS State Report does not provide a rate of lifetime intimate partner violence among Native Americans in New Mexico, nor the rate of intimate partner violence in the preceding 12 months to obtain an annual incidence estimate. Outside of municipal and county jurisdictions, there is no formalized process in place to capture the incidence of reported or unreported victimizations of Native Americans. It is recommended that such a process be established to improve the identification of Native American survivors to: a) enable survivors to be referred to appropriate services, b) increase investigation and prosecution of intimate partner crimes against Native Americans, c) improve the safety of Native American families and communities, and 4) obtain data to justify the need for funds to improve prevention, as well as New Mexico's response to Native American victimizations.

#### **L. Evidence Supporting the Need for Better Court Data on Domestic Violence**

Within the last five years, the Central Repository has worked with the AOC to obtain better quality data on interpersonal violence crimes. This effort has led to an expansion of the domestic violence crimes captured, which now include false imprisonment, criminal damage to property, deprivation of property, harassment, and violation of a restrictive order, in addition to the more typical battery/aggravated battery, assault/aggravated assault and stalking/aggravated stalking charges.

Still, quality protection order information is needed to determine the efficacy of protection orders, emergency protection orders, their rate of enforcement, and the consequences for violating protection orders for offenders and victims.

It is important to obtain better court data because evidence of currently available data demonstrates that there has been a steady decrease in the rate of domestic violence convictions in statewide district and magistrate courts. In 2017, the conviction rates of disposed domestic violence cases in district (29%) and magistrate courts (8%) are among the lowest rates of conviction over the last eight years.

Without better data from the courts, vital information such as why the dismissal rate in domestic violence cases has increased and why the rate of conviction for domestic violence cases has decreased, remains unknown. Answers to these questions will serve to improve the efficacy of legal advocacy for domestic violence victims.

### **M. Stalking Underreporting, Training, and Victim Referral**

New Mexico first enacted its stalking statute in 1997. In 2009, the legislature amended the definition of “pattern of conduct” in the statute to reflect the variety of behaviors stalkers were employing in cases across the state, including the use of technology. *N.M. Stat. Ann. § 30-3A-3(2010): (2) "pattern of conduct " means two or more acts, on more than one occasion, in which the alleged stalker by any action, method, device or means, directly, indirectly or through third parties, follows, monitors, surveils, threatens or communicates to or about a person.* The new statute also included a court ordered program intervention as part of the punishment for a convicted stalker, “*D. In addition to any punishment provided pursuant to the provisions of this section, the court shall order a person convicted of stalking to participate in and complete a program of professional counseling at the person's own expense or a domestic violence offender treatment or intervention program.*” The statute change in aggravated stalking was believed to be the most promising in law enforcement’s efforts to establish a stalking charge as it allowed a charge of aggravated stalking if a perpetrator merely violated an existing order of protection or conditions of release: *N.M. Stat. Ann. § 30-3A-3.1 2010): Aggravated stalking. A. Aggravated stalking consists of stalking perpetrated by a person: (1) who knowingly violates a permanent or temporary order of protection issued by a court, except that mutual violations of such orders may constitute a defense to aggravated stalking; (2) in violation of a court order setting conditions of release and bond.*

Even with new stalking policies, there are still too few cases of stalking recognized and charged as such by law enforcement agencies throughout the state. Nationally, the NISVS found that 19.0% of women and 6.1% of men were victims of stalking in their lifetime. Nationally from 2010-2012, the NISVS found that an average 4% of adult women each year and an average 1.9% of adult men each year were victims of stalking. If we used the national annual rate to estimate the number of women stalking victims in New Mexico in 2012, it would mean that there were an estimated 33,610 women stalking victims that year (800,247 women [18 and over] x 4.2%). Similarly, if we used the national annual rate to estimate the number of men stalking victims in New Mexico in 2012 (770,669 men [18 and over] x 1.9%), it would mean that there were an estimated 14,642 men stalking victims that year. Therefore in 2012, there would be an estimated 48,252 stalking victims in New Mexico. The most stalking cases identified in New Mexico in 2012 was 312 reported by statewide district and magistrate courts. Statewide law enforcement agencies that year reported 68 total cases. In 2017, 150 new stalking and aggravated stalking cases were filed in New Mexico district and magistrate courts; and statewide law enforcement agencies identified 145 stalking victims.

There are numerous administrative and procedural issues that affect accurate reporting of domestic violence and stalking incidents ranging from whether and how police offense incident reports are written to how these reports are entered into law enforcement databases or otherwise counted.

The issues surrounding identification of stalking incidents and victims present obstacles for victims to obtain access to the necessary safety and advocacy services for themselves and their children. This is explained in part by the fact that most stalking cases are labeled other crimes (harassment, vandalism, destruction of property, arson, trespassing, car theft, etc.) and are therefore not captured. The failure to differentiate between stalking victims and victims of isolated crimes means that many stalking victims are not getting referred for appropriate services. This is a significant problem because interpersonal violence crimes many times co-occur. The NISVS found that 68.1% of women and 64.7% of men stalking victims in the prior 12 months of the survey experienced threats of harm; and 61.5% of women and 42.8% of men in the prior 12 months were stalked by an intimate partner. These victims and their children are at greater health and safety risk and need to be referred for appropriate services; and these types of referrals are not likely to happen as a result of a trespass, vandalism, or other similarly labeled, isolated crime incident.

It is imperative to provide necessary training to all law enforcement officers, administrative personnel, and executive personnel whose policies guide law enforcement procedure regarding the description, documentation, and data entry of stalking crimes, and referrals of stalking victims to appropriate services.

**INCIDENCE AND NATURE OF DOMESTIC VIOLENCE IN NEW MEXICO XVII:  
An Analysis of 2017 Data from  
The New Mexico Interpersonal Violence Data Central Repository**

Office of Injury Prevention,  
Epidemiology and Response Division,  
New Mexico Department of Health  
Through the  
New Mexico Coalition of Sexual Assault Programs

**July 2018**

## I. INTRODUCTION

In 2005, the Department of Health, Office of Injury Prevention obtained funds to conduct a statewide Survey of Violence Victimization (SVV). The purpose of the survey was to obtain state estimates of the prevalence and nature of victimization among adults in New Mexico. Preliminary findings from the SVV were published in *Incidence and Nature of Domestic Violence In New Mexico VI, July 2006*. Additionally, findings on the lifetime prevalence of domestic violence, its nature, and impact on victims and their families were published in the *Incidence and Nature of Domestic Violence In New Mexico VII, July 2007*. These reports can be found on-line at [nmcswp.org](http://nmcswp.org).

The Central Repository has been publishing the baseline rates of domestic violence, stalking, and sexual assault for New Mexico every year since 2006, on the FACT SHEET of its annual *Incidence and Nature of Domestic Violence In New Mexico* report. As it has been thirteen years since the first statewide victimization survey, it is time to conduct a follow-up survey to measure changes in incidence and prevalence rates in interpersonal crimes in New Mexico. However to date, due to funding challenges, no funds have been appropriated for this purpose. While obtaining baseline rates were critical to more accurately estimate the rates of “unreported” interpersonal violence crimes in New Mexico, the age of these data now render the findings less relevant.

The National Intimate Partner and Sexual Violence Survey (NISVS) funded by the National Center for Injury Prevention and Control of the Centers for Disease Control and Prevention, is an on-going survey of sexual violence, stalking, and intimate partner violence among adult women and men in the United States. Fortunately, data collected from 2010-2012 were analyzed to determine estimated lifetime rates of specific interpersonal violence victimizations for all 50 states and the District of Columbia and published in the NISVS 2010-2012 State Report. While annual incidence rates are not available for most states, this report is invaluable to provide lifetime estimates of these reported and unreported interpersonal violence crimes that could otherwise not be obtained unless each state had the funds to conduct its own victimization survey.

Current estimates of each of the specified interpersonal violence crimes presented on the FACT SHEET of this report are based on the NISVS 2010-2012 State Report, hereafter referred to as the NISVS State Report.

The NISVS State Report found significant differences in the prevalence of lifetime interpersonal violence among survivors of different racial/ethnic groups. In 2017, findings from an examination of six years of individualized domestic violence data from the Albuquerque Sane Collaborative were published in a special supplement of the *Incidence and Nature of Domestic Violence in NM, XVI* report, 2017. This special supplement, *An Examination of Domestic Violence by Survivor Race/Ethnicity in Bernalillo County*, can be found on-line at [nmcswp.org](http://nmcswp.org).

From 2010 to 2012, the Adult Survivor Database (ASD) was developed in collaboration with the New Mexico Coalition Against Domestic Violence to capture research information on individual domestic violence survivors who seek assistance from statewide domestic violence service providers. The individual data made possible the study of existing relationships between factors that influence risk and outcomes of domestic violence victimization. Findings from the ASD were first published in the 2013 *Incidence and Nature of Domestic Violence XII*, report. To review these findings see **Appendix A: Life Experiences of Adult Survivors of Domestic Violence**.

*Section One* of this report presents an analysis of calendar year 2017 aggregate law enforcement and service provider domestic violence data and individual data from the Administration Office of the Courts which are all submitted to the New Mexico Interpersonal Violence Data Central Repository.

*Section Two* presents a discussion of the implications of the findings presented herein, the findings from the ASD and NISVS data, and a review of the data limitations to highlight future data needs.

*Section Three* presents an analysis of 16 important domestic violence variables for each individual county, so that the reader can access important domestic violence trends in his/her county at a glance.

## **SECTION ONE: ANALYSIS OF 2017 DOMESTIC VIOLENCE LAW ENFORCEMENT, SERVICE PROVIDER, AND COURT DATA FROM THE CENTRAL REPOSITORY**

### **I. DEFINITIONS**

Domestic violence incidence as determined by law enforcement include all incidents of assault, aggravated assault, battery, aggravated battery, and criminal damage to property as outlined in the “Crimes Against Household Members Act” in statutes 30-3-10 through 3-3-18. Full definitions are found in **Appendix B**.

Data submitted from law enforcement agencies are used to determine statewide domestic violence reported incidence and the county rates of reported domestic violence.

Domestic violence cases, as determined by domestic violence service providers, include all adult victims who are accepted as clients by the providers for delivery of services. Data on children victim-witnesses and offenders served by domestic violence service providers are also analyzed and presented herein. None of the cases served by the domestic violence service providers are considered in the county reported rates of incidence to avoid possible duplication of reporting.

Domestic violence data from all magistrate and district courts include codes that capture aggravated assault, aggravated battery, aggravated stalking, assault, battery, stalking, assault with intent to commit a violent felony, criminal damage to property, deprivation of property, false imprisonment, violation of a protective order, and harassment - all against a household member. These codes are extracted from the Administrative Office of the Courts Judicial Information System.

Currently, standardized data from each aforementioned discipline are submitted to the Central Repository on a quarterly basis. The data from the Central Repository analyzed for this report covers domestic violence data for the period 1/1/17 – 12/31/17.

### **II. LAW ENFORCEMENT AND SERVICE PROVIDER DATA FINDINGS**

#### **A. Domestic Violence Incidents in 2017 Identified by Law Enforcement**

There were 108 law enforcement agencies that submitted domestic violence data to the Central Repository during 2017 (see **Appendix C**). Data from each participating agency was extracted from police offense incident reports and submitted in aggregate form on the standardized *Law Enforcement Domestic Violence Data Collection Form* (see **Appendix D**).

The total number of reports for each variable analyzed from law enforcement vary as all questions may not be answered on each report submitted. The number of reports considered for each question analyzed

is stated throughout the report as the findings on each variable are discussed. There were 19,234 domestic violence incidents identified by statewide law enforcement agencies in 2017. This represents a 3% decrease from that reported in 2016 (19,746).

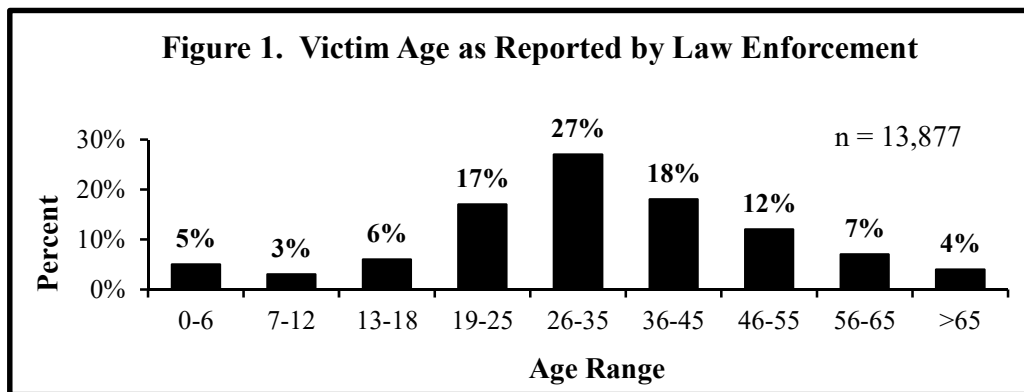

- ▶ Law Enforcement-Reported Domestic Violence Incidents, 2017: 19,234
- ▶ Reported Incidents by County, Alphabetically **Appendix E**
- ▶ County Rates and Ranks, by Rank **Appendix F**
- ▶ County Rates and Ranks, Alphabetically **Appendix G**
- ▶ Reported Rate Trends For Each County 2013 - 2017 **Section 3A**
- ▶ Incidents Reported by Law Enforcement Agency **Table 1**
- ▶ Law Enforcement-Reported Incidents by Agency and County **Table 2**

**B. Domestic Violence Victims Identified by Law Enforcement: Number, Gender, and Age**

There were 105 law enforcement agencies that reported the number of victims involved in their domestic violence incidents. Of 19,199 incidents reported by these agencies, 21,362 victims were identified.

- ▶ Number of Adult Victims Identified by Law Enforcement 21,362
- ▶ Number Gender Known 16,664
- ▶ Number Male Victims 4,889 (29%)
- ▶ Number Female Victims 11,775 (71%)
- ▶ Number and Gender of Victims by Law Enforcement Agency **Table 3**

Of the 13,877 reports that identified *victim age*, the greatest proportion of all victims was in the age group 26-35 (27%), followed by 36-45 (18%). The age group 19-25 comprised 17% of all victims. See **Figure 1**.

**C. Domestic Violence Suspects Identified by Law Enforcement: Number, Gender, and Age**

All 108 law enforcement agencies reported the number of suspects involved in their domestic violence incidents. Of 19,234 incidents reported by these agencies, 20,672 suspects were identified.

- ▶ Number of Suspects Identified by Law Enforcement 20,672
- ▶ Number of Suspects Gender Known 15,231

▶ Number Male Suspects	11,158 (73%)
▶ Number Female Suspects	4,073 (27%)
▶ Number and Gender of Suspects by Law Enforcement Agency	<b>Table 4</b>

Of 15,296 reports that identified *suspect age*, the age group with the greatest proportion of reported suspects was 26-35 (35%), followed by 19-25 and 36-45 (21%, respectively). See **Figure 2**.

#### D. Race/Ethnicity of Victims and Suspects Identified by Law Enforcement

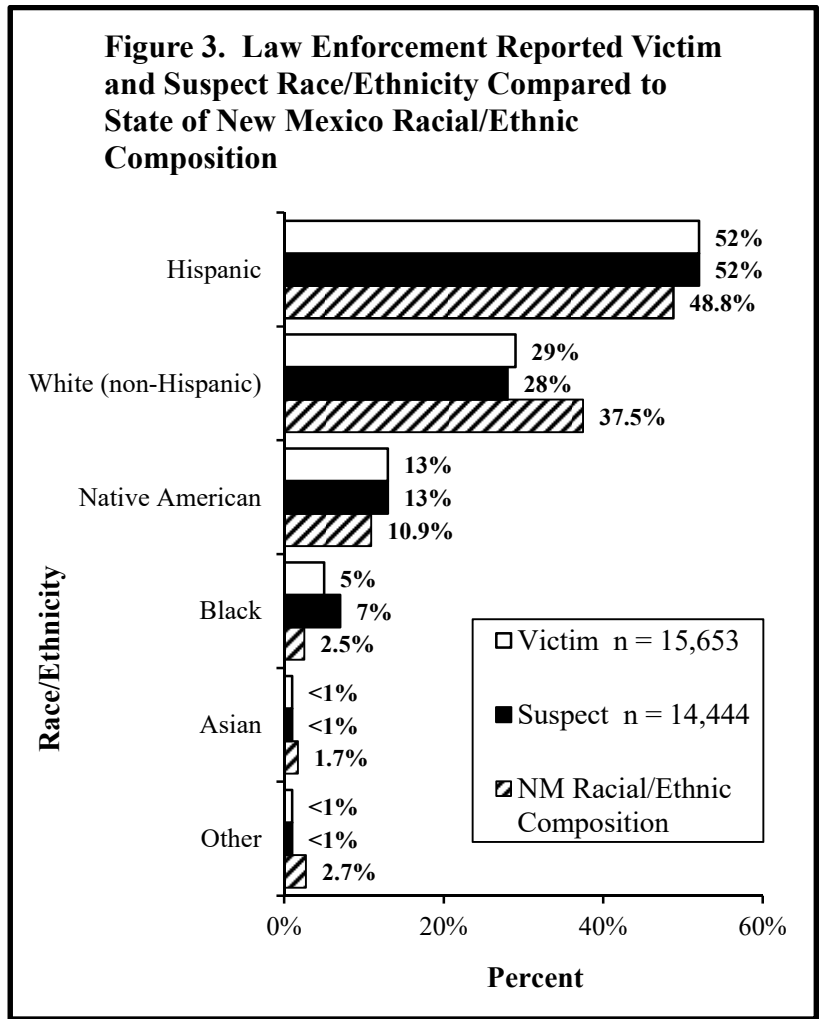

▶ Number of Law Enforcement Victims Race/Ethnicity Identified	15,653
▶ Number of Law Enforcement Suspects Race/Ethnicity Identified	14,444

Of 15,653 domestic violence victims, 52% (8,092) were Hispanic, 29% (4,608) White (non-Hispanic), 13% (2,094) Native American, 5% (785) Black, <1% respectively, Asian, (68) and victims of “other” races (6). Likewise, of the 14,444 reports that identified suspect race/ethnicity, 52% (7,468) were Hispanic, 28% (3,979) White (non-Hispanic), 13% (1,903) Native American, and 7% (1,061) Black. Asian suspects (31) and suspects of “other” races (2) comprised <1% respectively, of all suspects. For a comparison of victim and suspect race/ethnicity to racial/ethnic compositions in New Mexico, see **Figure 3**.

#### E. Stalking and Harassment Incidents Identified by Law Enforcement

There were 3,019 law enforcement reports that documented the number of stalking cases that came to the attention of law enforcement in 2017. Of these, 145 (5%) stalking cases were identified. Similarly, there were 4,570 reports that documented the number of harassment cases that came to the attention of law enforcement. Of these, 1,303 (28.5%) harassment cases were identified.

▶ Number of Law Enforcement-Identified Domestic Violence Incidents	19,234
▶ Number of Law Enforcement Reports Documenting Stalking Status	3,019
▶ Number of Stalking Incidents Identified by Law Enforcement	145 (5%)
▶ Number of Stalking Cases Reported by Law Enforcement Agency	<b>Table 5</b>
▶ Number of Law Enforcement Reports Documenting Harassment Status	4,570
▶ Number of Harassment Incidents Identified by Law Enforcement	1,303 (28.5%)
▶ Number of Stalking and Harassment Cases Reported by County	<b>Table 6</b>

**F. Domestic Violence Victims Served by Domestic Violence Service Providers**

There were 28 domestic violence service providers that submitted data to the Central Repository for 2017 (see **Appendix H**). Aggregate data from each participating agency was extracted from client intake information and submitted on the standardized *Domestic Violence Service Agencies Data Collection Form* (see **Appendix I**).

The total number of reports for each variable analyzed from service providers vary as all questions may not be answered on each report submitted. The number of reports considered for each question analyzed is stated throughout the report as the findings on each variable are discussed.

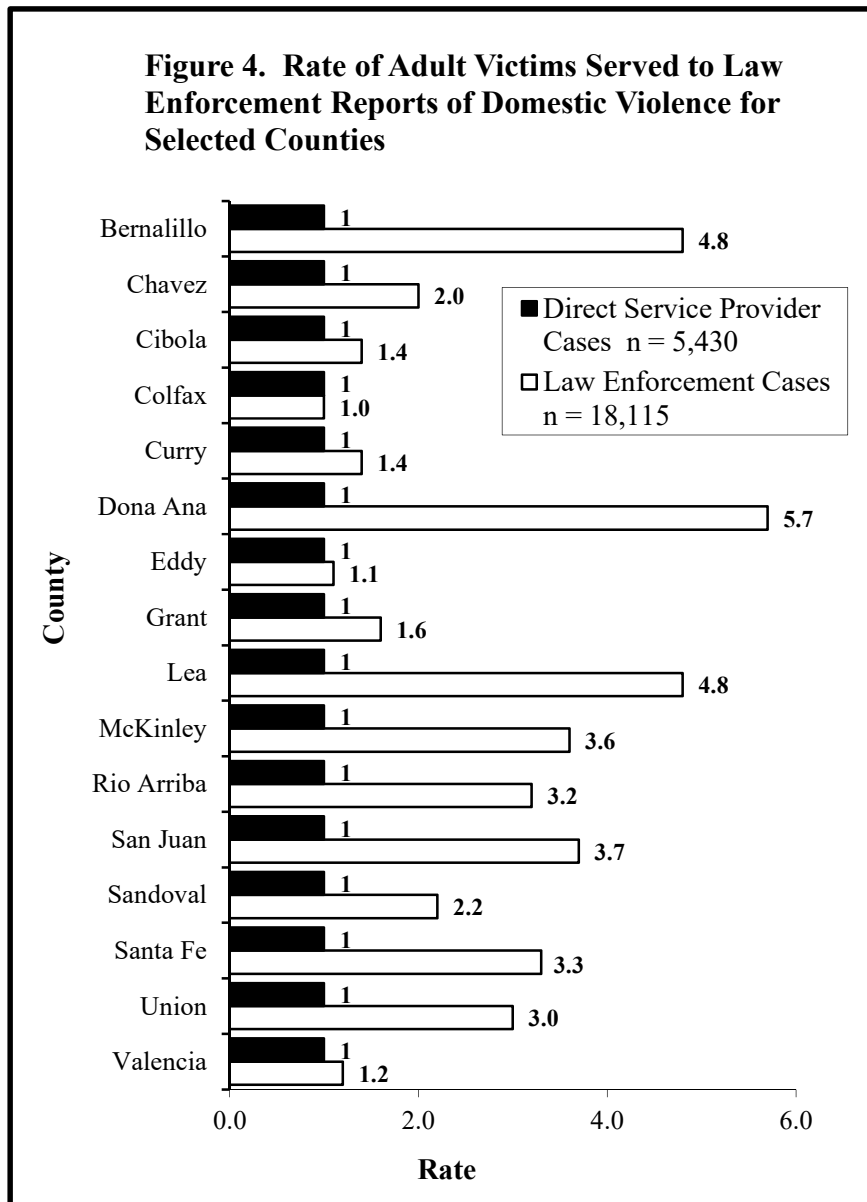

**1. Number Seeking Services**

There were 10,413 new clients served during 2017, which is a 2% decrease in the number of clients served in 2016 (10,630).

- ▶ Number of Adult Victims, Children, and Offenders Served for All Counties
- ▶ Number of Adult Victims Served by Agency
- ▶ Five-Year Trends of All Served for Each County
- ▶ Total Number of Adult Victims Served by Service Providers
- ▶ Total Number of Children Victim/Witnesses Served by Service Providers
- ▶ Total Number of Offenders Treated by Service Providers
- ▶ Number of Offenders Treated by Agency

<b>Table 7</b>
<b>Table 8</b>
<b>Section 3B</b>
6,482
2,789
1,142
<b>Table 9</b>

An analysis was conducted comparing the number of adult victims served to the number of domestic violence incidents reported by law enforcement (in counties with the law enforcement agency from the largest city reporting, *and* where the direct service provider reported in all four quarters of 2017). This analysis revealed that *Dona Ana County* had the fewest number of victims receiving services relative to the number of incidents reported to police (1 out of 5.7), followed by *Lea* and *Bernalillo Counties* (1 out of 4.8, respectively), *San Juan County* (1 out of 3.7), and *McKinley County* (1 out of 3.6). See **Figure 4**.

Adult victims who went for help in 2017 (6,482) represent 30% of domestic violence victims identified by law enforcement (21,362). This is fewer than the 34% of law enforcement victims represented by adult victims served in 2016.

- Five-Year Trends in The Percent of Law Enforcement Domestic Violence Incidents Represented by The Number of Adult Victims Served for Individual Counties

**Section 3C**

Offenders who went for treatment (1,142) represent 5.5% of the domestic violence suspects identified by law enforcement (20,672). This is a 4.5% decrease from those represented in 2016.

**2. Gender of Those Served**

Survivor gender was documented in 6,442 adult victims served. Ninety-two percent (5,962) of the adult victims served were female. Conversely, 79% (904) of the 1,140 reports that documented offender gender, reported the offender was male. Gender was documented 2,766 of the children victim-witnesses served. Fifty-two percent (1,450) were female children and 48% (1,316) were male children. See **Figure 5**.

- Number of Victims Served by Each Service Provider Agency, by Gender
- Number of Offenders Served by Service Provider Agency, by Gender

**Table 10**  
**Table 11**

**3. Ages of Those Served**

The age of the adult victim was documented in 5,881 provider reports. Among adult victims, 61% (3,574) were predominately 22-40 years of age, 27% (1,561) were 41-59 years of age, and 7% (413) were 18-21 years of age. Victims ages 60-74 comprised 5% (281) of all adult victims served, and victims ages >74 comprised 1% (51). See **Figure 6**.

Of the 1,024 reports that documented offender age, 66% (673) were 22-40 years old, 21% (217) were 41-59 years old, 12% (122) were 18-21 years old, and 2% (21), ages 60-74 years old. Refer to Figure 6.

The age of children victim-witnesses was documented in 2,562 of the children served. Forty percent (1,015) of the children victim-witnesses were <6 years old, 39% (996) were 6-11 years old, 21% (547) were 12-17 years old, and <1% (4) were 18-21 years old. See Figure 7.

#### 4. Race/Ethnicity of Those Served

The race/ethnicity of the adult victim was identified in 6,271 reports. Of these, 51% (3,208) were Hispanic, 29% (1,810) White (non-Hispanic), 13% (839) Native American, 4% (224) Black, 3% (162) “other”, and <1% (28) Asian. For a comparison of adult victims’ racial/ethnic distribution to the racial/ethnic composition of New Mexico, see Figure 8.

**Figure 8. Ethnicity/Race of Victims, Offenders, and Child Witnesses (as Reported by Domestic Violence Service Providers) Compared to State of New Mexico Ethnic/Racial Composition**

Hispanics comprised 56% (1,419) of the 2,512 children victim-witnesses where race/ethnicity was documented, followed by 19% (454) Native Americans, 17% (426) of Whites (non-Hispanics), 5% (132) Blacks, 2% (45) “other” races and <1% (6) Asians. Refer to Figure 8.

Of the 1,125 offender reports that documented offender race/ethnicity, the racial/ethnic group with the greatest number of offenders represented were Hispanics, 48% (542), followed by Whites (non-Hispanics), 29% (325), Native Americans, 17% (191), Blacks, 4% (45), “other” race/ethnicity, 2% (20), and Asians, <1 (2). Refer to Figure 8.

**G. Domestic Violence Incidents That Involve Alcohol and/or Drug Use**

- ▶ Law Enforcement Reports Documenting Alcohol/Drug Use Status 14,151
- ▶ Number Law Enforcement Incidents Involving Alcohol/Drug Use 3,793 (27%)
- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Involving Alcohol/Drug Use for All Counties **Table 12**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Alcohol/Drug Use for Each County **Section 3D**

**H. Alcohol and/or Drug Use Among Victims Who Sought Help**

- ▶ Number of Service-Provider Victim Reports Documenting Alcohol/Drug Status 4,346
- ▶ Number of Adult Victims Served Who Reported Using Alcohol/Drugs At The Time of The Domestic Violence Incident 865 (20%)

One-fifth (20%) of service provider cases reported victim use of alcohol/drugs at the time of their domestic violence incident. Service providers reported that two-thirds (68%) of adult victim domestic violence cases involved an offender who was using alcohol/drugs. See **Figure 9**.

- ▶ Number of Adult Victims Served Who Reported Whether Their Offender Was Using Alcohol/Drugs At The Time of The Domestic Violence Incident 3,560
- ▶ Number of These Reporting Offender Use of Alcohol/Drugs (Refer to Figure 9) 2,435 (68%)
- ▶ Number of Service-Provider Offender Reports Documenting Alcohol/Drug Status 847
- ▶ Number of Offenders Served Who Reported Using Alcohol/Drugs At The Time of The Domestic Violence Incident 357 (42%)

## I. Domestic Violence Incidents That Involve A Weapon

- ▶ Number of Law Enforcement Reports Documenting Weapon Use Status 13,778
- ▶ Number of Law Enforcement-Reported Incidents Involving A Weapon 8,021 (58%)
- ▶ Number of Law Enforcement-Reported Incidents Involving A Weapon by Agency **Table 13**
- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Involving A Weapon for All Counties **Table 14**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Weapon Use for Each County **Section 3E**

There were 8,648 weapons identified in the 8,021 domestic violence incidents where a weapon was used because in some incidents, more than one type of weapon was used. A knife was used in 7% (564) of the incidents involving weapons. A firearm was used in 4% (332) of the incidents involving weapons, and “other” weapons including, “personal” weapons (fist, feet, etc.) and “non-personal” weapons (boards, lamps, etc.) were used in 97% of the incidents involving weapons. See **Figure 10**.

Percent exceeds 100 as more than one type of weapon may be used in each incident.

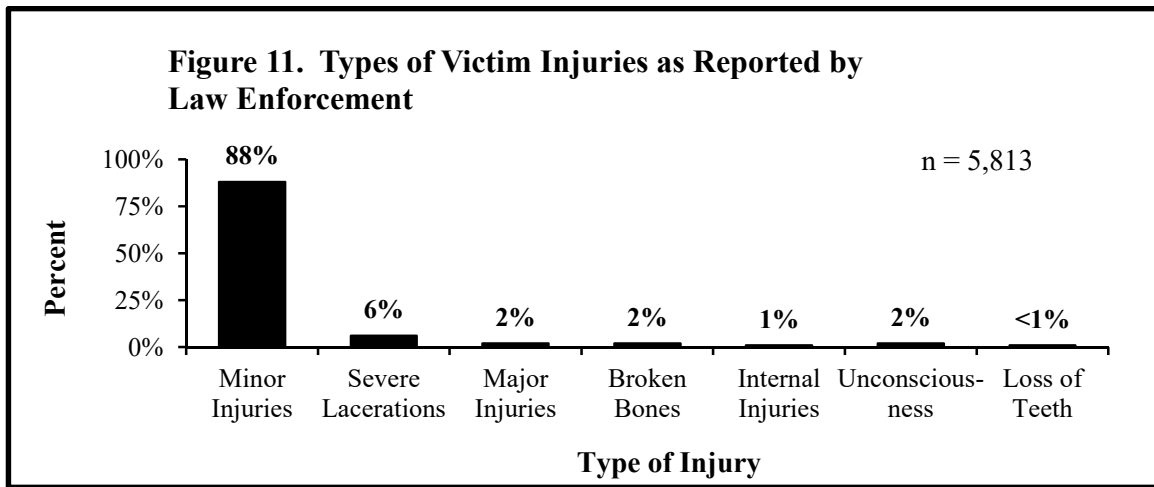

## J. Weapon Use Among Those Who Sought Help

- ▶ Number of Service Provider Cases Documenting Weapon Use Status 5,116
- ▶ Number of Service Provider Cases Involving A Weapon 1,143 (22%)
- ▶ Number of Service Provider Cases Involving A Weapon by Agency **Table 15**

## K. Domestic Violence Incidents That Involve Injury to Adult Victims

- ▶ Number of Law Enforcement Incidents Documenting Injury Status 14,094
- ▶ Number of Law Enforcement Incidents Involving Injury 5,836 (41%)
- ▶ Percent Law Enforcement-Reported Incidents Involving Injury by County **Table 16**
- ▶ Five-Year Trends in Domestic Violence Cases Involving Victim Injury for Each County **Section 3F**

There were 5,813 injuries documented in the 5,836 cases involving injury. Of these, 88% (5,120) of all injuries were minor, 6% (323) severe lacerations, 2% respectively, major injuries (118), broken bones (90) and unconsciousness (128), 1% (30) internal injuries, and <1% (4) loss of teeth. See **Figure 11**.

**L. Domestic Violence Incidents That Have Children Present At The Scene**

- ▶ Number of Service Provider Reports That Documented Whether Children Were Present 5,310
- ▶ Number of Service Provider Domestic Violence Cases with Children Present 1,587 (30%)
- ▶ Number of Law Enforcement Domestic Violence Reports Documenting Status Of Children Present 14,446
- ▶ Number of Law Enforcement Domestic Violence Incidents with Children Present 4,324 (30%)
- ▶ Total Number of Children Present at the Scene of Domestic Violence Incidents 6,718

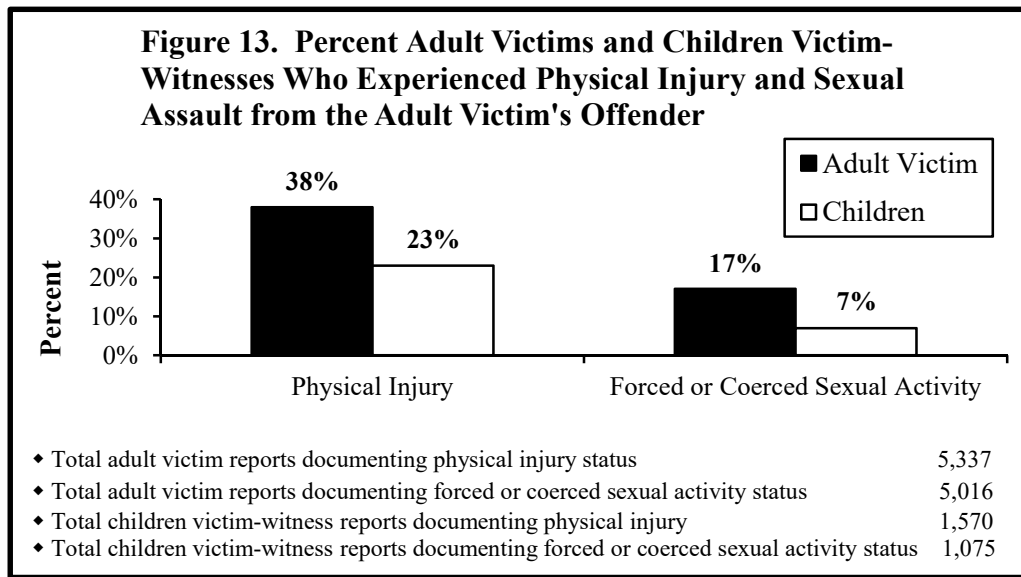

As reported by law enforcement, the ages of the children witnesses were documented in 6,226 cases. Over one-third (35%) of these children were under 6 years of age, 18% were 6-9 years of age, and 13% were ages 10 - 12. Therefore, two-thirds (66%) of the children who witnessed domestic violence incidents were not yet adolescents. Adolescents ages 13 - 17 comprised 25% of the children at the domestic violence scenes, while young adults ages 18-21, comprised 10% of those who witnessed domestic abuse. See **Figure 12**.

There were 14,439 law enforcement-reported domestic violence incidents that documented both the number of incidents with children present and the number of children present. Of these incidents, 4,322 had children present and the total number of children present was 6,718 or 1.5 children per incident.

**M. Injury and Sexual Assault Among Adult Victims and Children Who Sought Help**

Of 5,337 service provider reports, 2,050 (38%) adult victims reported being physically injured from the domestic assault. Similarly, there were 5,016 provider reports that identified 858 (17%) adult victims who experienced forced or coerced sexual activity from the current offender. See **Figure 13**.

There were 1,570 service provider reports that identified 365 (23%) children victim-witnesses that experienced physical abuse from the current offender of the adult victim. Similarly, there were 1,075 provider reports that identified 74 (7%) children victim-witnesses who experienced sexual abuse from the current offender of the adult victim. Refer to Figure 13.

**N. Victim/Suspect Relationship**

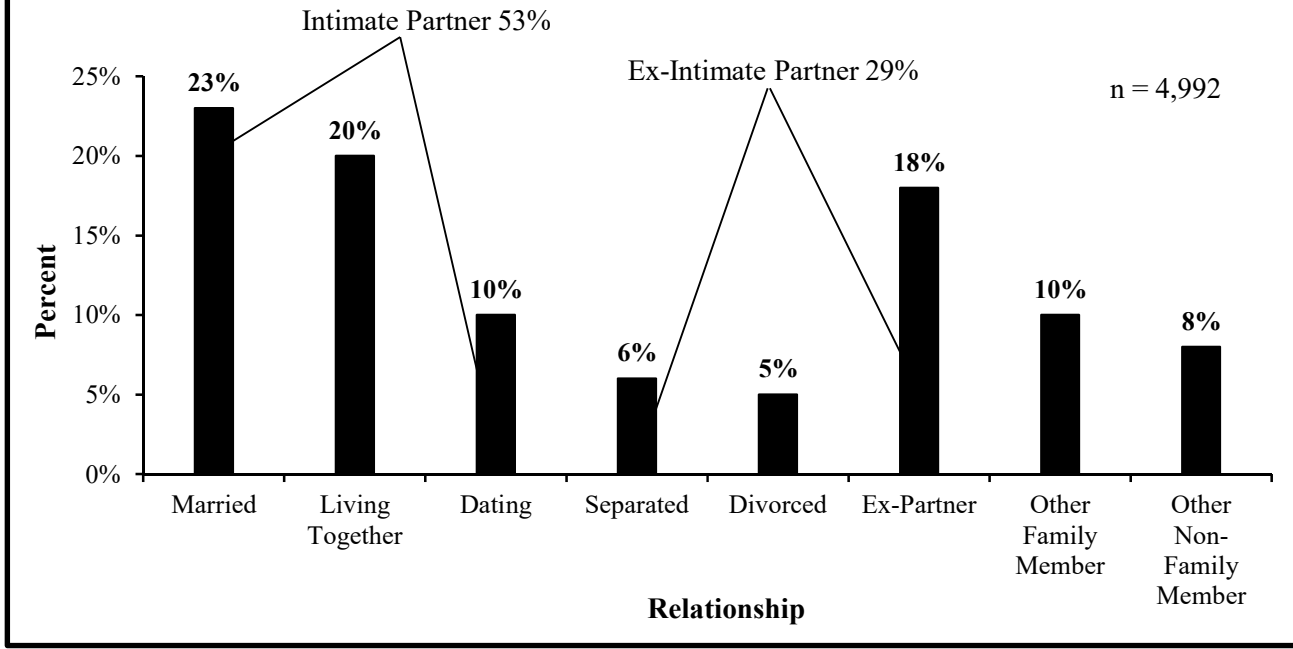

Of 20,672 suspects reported by law enforcement, their relationship to the victim was documented among 13,442. Of these, a total of 45% were *boyfriend/girlfriend* and 3%, *ex-boyfriend/ex-girlfriend*. *Relatives* accounted for 30 % of identified victim/suspect relationships. The victim/suspect relationships in 13% were a *spouse* and (3%) an *ex-spouse*, 1% (186) were a *gay partner* and <1% (4) a *gay ex-partner*. See **Figure 14**.

The victim/offender relationship was documented in 4,992 service provider reports. Half (53%) of offenders were intimate partners of their victims with the following relationship descriptions: married (23%), living together (20%) or dating (10%). Over one-quarter (29%) of offenders were ex-intimate partners of their victims, with the following relationship descriptions: separated (6%), divorced (5%), or ex-partner (18%). Another 10% of offenders were a family member of the victim, and 8% other non-family members of the victim. See **Figure 15**.

**Figure 14. Victim/Suspect Relationship as Reported by Law Enforcement**

**Figure 15. Type of Survivor/Offender Relationship, as Reported by Service Providers**

**O. Length of Victim/Offender Relationships**

There were 4,578 reports that documented the length of relationship between the victim and offender. Most victims reported a relationship duration of 3-5 years (21%), followed by those in relationship for 6-10 years and 1-2 years (19%, respectively), 11-20 years (16%), less than one year and over 20 years (12%, respectively). See **Figure 16**.

**P. Victims and Offenders Abused As Children**

In 2017, there were 769 offender reports that documented past abuse. Of these, 44% (340) of offenders reported experiencing abuse as a child. However, when victims were asked if their offender was abused as a child, 33% (187 of 563) reported that their offender experienced abuse as a child. See **Figure 17**.

*Past victim abuse and/or the witnessing of abuse as a child* was documented in 3,200 adult victim provider reports. Half (56% or 1,781) of adult victims reported experiencing abuse as a child. Refer to Figure 17. Additionally, 54% or 3,508 of 6,482 adult victims reported experiencing at least one prior domestic violence incident as an adult.

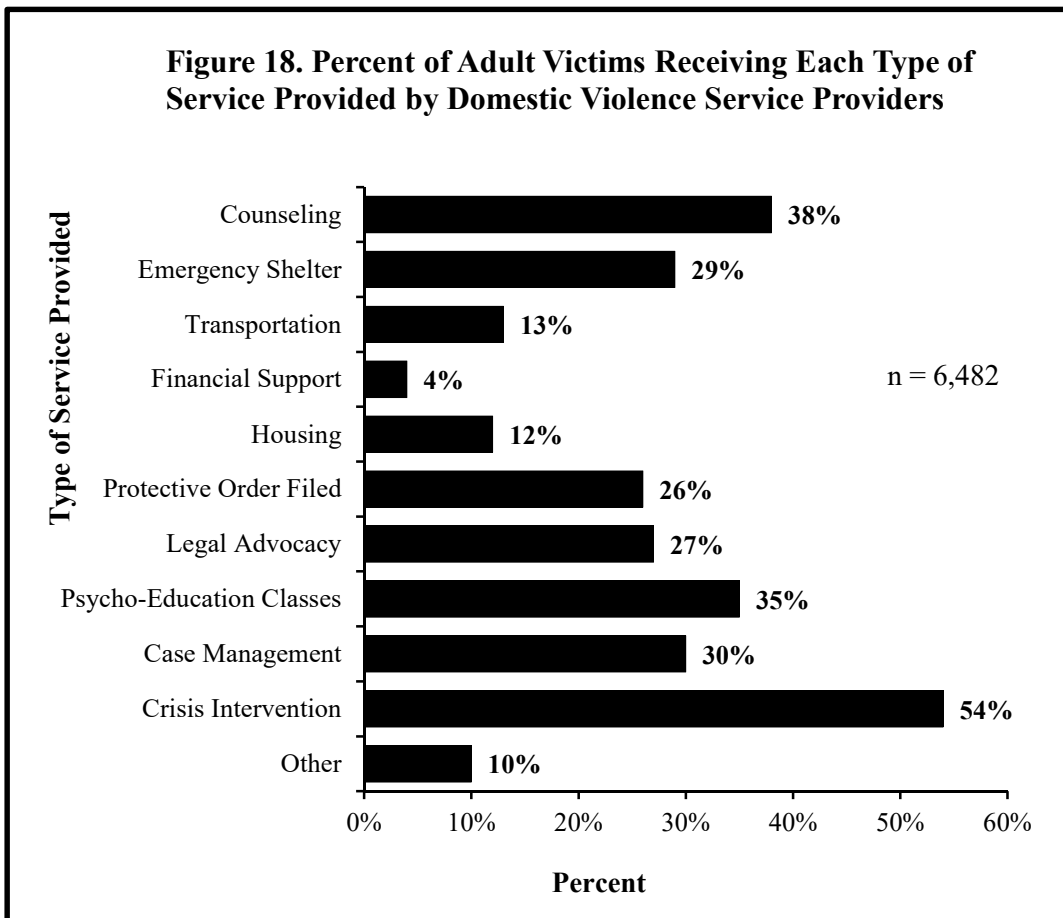

**Q. Sources of Adult Victims’ Referrals for Help and The Services They Receive**

Of 5,582 referrals documented, most (28%) adult victims were referred to service providers by law enforcement, followed by those who were self-referred (26%). See **Table 17**. Additionally, service providers throughout the state responded to 13,005 crisis/hotline calls, a 21% increase from the number fielded in 2016 (10,761). The *Domestic Violence Resource Center* (Albuquerque) responded to the most crisis calls, 34% (4,362), followed by *Community Against Violence*, 13% (1,625), *SAFE House* (Albuquerque), 9% (1,183), *Haven House*, 6% (843), and *Enlace Comunitario*, 5% (631). See **Table 18**.

- ▶ Sources of Adult Victim Referrals and The Number Referred from Each **Table 17**
- ▶ Crisis/Hotline Calls By Agency **Table 18**
- ▶ Crisis/Hotline Calls by County **Table 19**

The service that most adult victims received was crisis intervention (54%), followed by counseling (38%), psycho-education classes (35%), case management (30%), emergency shelter (29%), legal advocacy (27%), and filing of a protection order (26%). See **Figure 18**.

- ▶ Five-Year Trends in the Number of Adult Victims Served And the Number Receiving Each Service for Each County **Section 3G**
- ▶ Five-Year Trends in the Number of Crises/Hotline Calls for Each County **Section 3H**

**R. Sources of Child Referrals for Help and Services They Receive**

Of 1,593 child referrals, most (80%) were referred by a family member/relative, followed by those who were self-referred (7%), and referred by law enforcement (5%).

► Sources of Children Referrals and The Number Referred from Each. **Table 20**

The specified service that most children received was emergency shelter (60%), followed by case management (24%), and counseling (18%). See **Figure 19**.

► Five-Year Trends in the Number of Children Served And the Number Receiving Each Service for Each County **Section 3I**

**S. Sources of Offender Referrals for Help and Services They Receive**

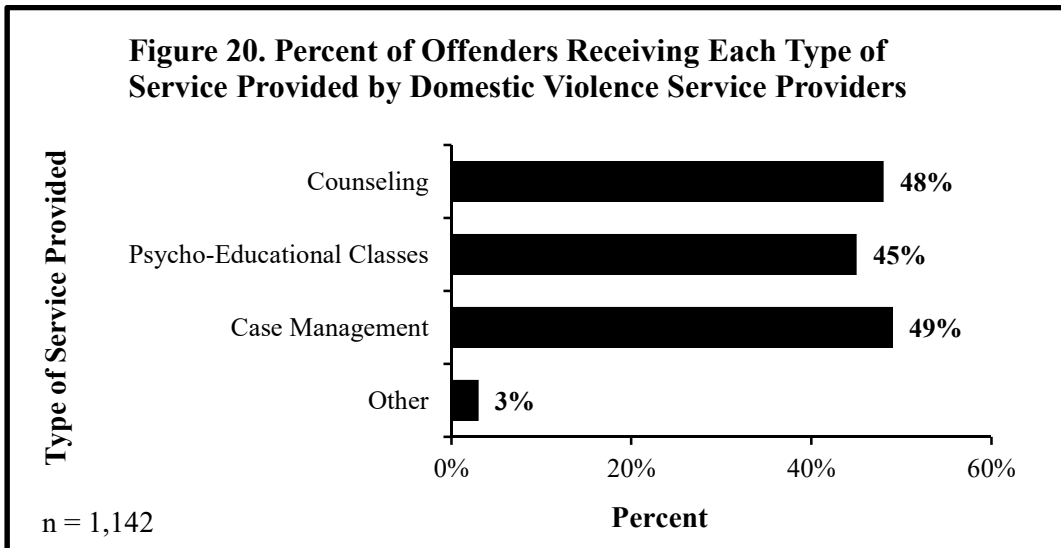

Of 1,067 offender referrals, most (81%) were referred for services by adult court, followed by CYFD-CPS (7%).

► Sources of Offender Referrals and The Number Referred from Each **Table 21**

Most (49%) offenders received case management, followed by counseling (48%), and psycho-educational classes (45%), and 3% received “other” services. See **Figure 20**.

► Five-Year Trends in the Number of Offenders Served And the Number Receiving Each Service for Each County **Section 3J**

**T. Adult Victims Who Sought Help and Reported Their Domestic Violence Incident to Police**

There were 5,374 reports that identified victim-reporting to law enforcement. Of these, 55% (2,950) reported their domestic violence incident to law enforcement.

- ▶ Percent Domestic Violence Incidents Reported to Law Enforcement by Service Provider Agency

**Table 22**

**U. Law Enforcement Domestic Violence Incidents That Resulted in A Suspect Arrest**

- ▶ Number of Law Enforcement-Reported Domestic Violence Incidents Documenting Arrest Status 14,360
- ▶ Number of These With a Suspect Arrest 5,415 (38%)
- ▶ Number of Domestic Violence Incidents With No Arrest 8,491 (59%)
- ▶ Arrest Rates of All Law Enforcement Agencies **Table 23**
- ▶ Arrest Rates for All Counties **Table 24**

- ▶ Five-Year Trends in the Percent of Suspect Arrests for Each County **Section 3K**

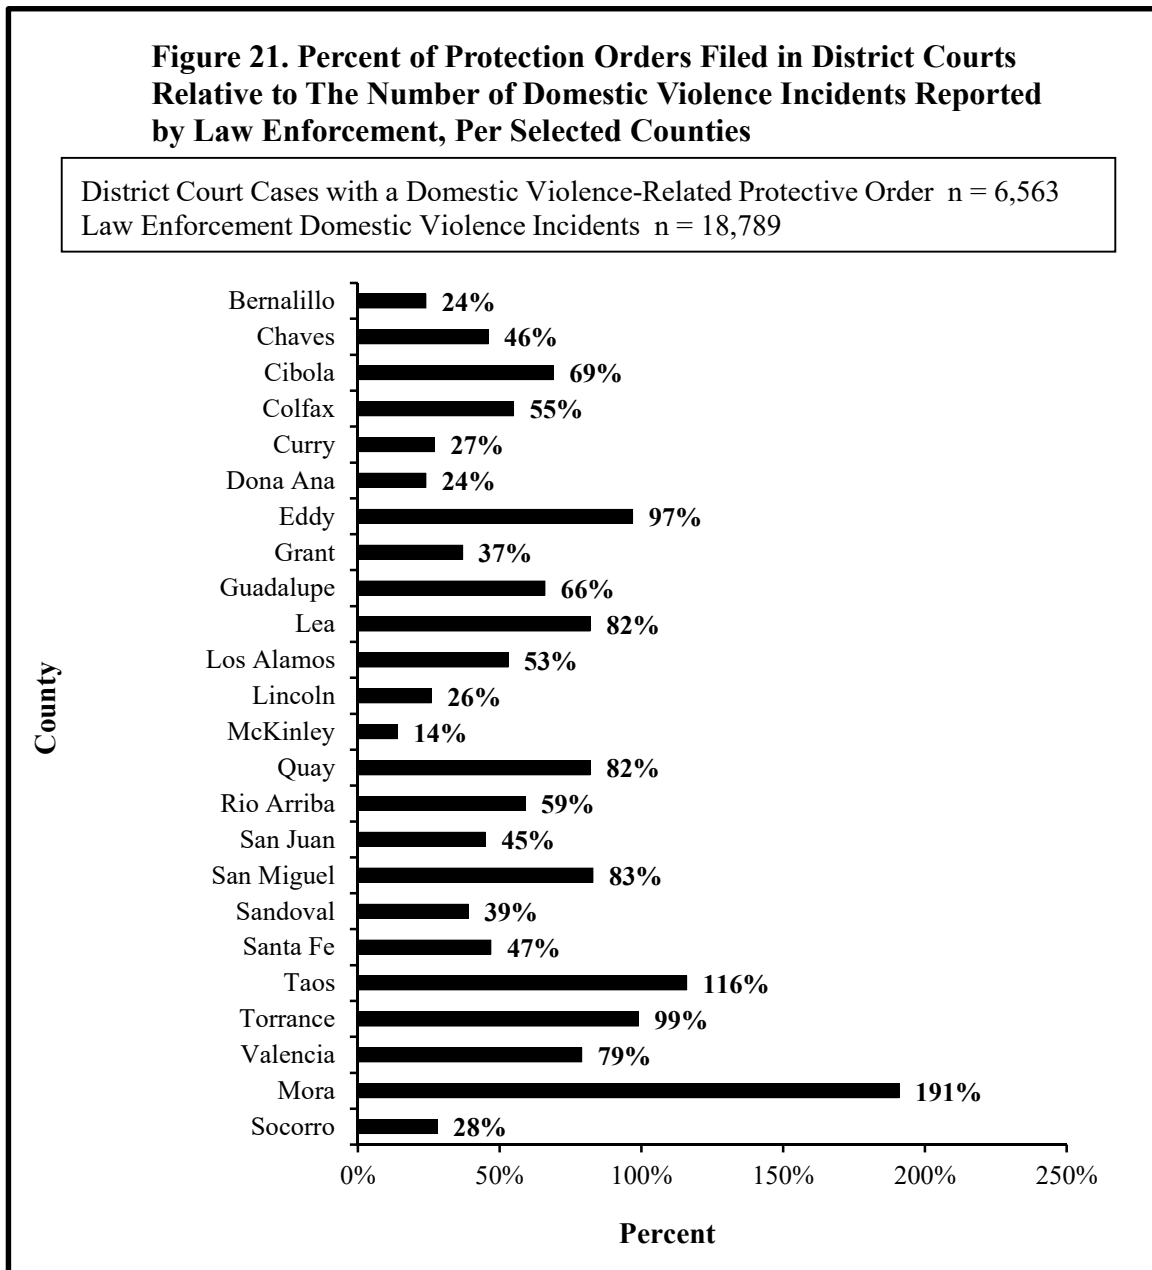

**V. Adult Victims of Domestic Violence Who Filed a Protection Order**

- ▶ Number of Law Enforcement-Reported Domestic Violence Cases 19,234
- ▶ Number of Domestic Violence-Related Cases for which a Protection Order was Issued in District Courts 6,958 (36%)
- ▶ Number of Law Enforcement-Reported Domestic Violence Cases Represented By the Number of Domestic Violence Cases for which a Protection Order was Issued by District Courts **Table 25**
- ▶ Number of Domestic Violence-Related Cases for which a Protection Order was Issued by County **Table 26**
- ▶ Total Number of Protection Orders Issued in District Courts 11,872
- ▶ Total Number of District Court Protection Orders Issued by County **Table 27**

In counties with the most complete reporting (those with the law enforcement agency from the largest city in the county reporting) and with a minimum of 20 cases, a comparison was made between the number of domestic violence-related cases for which a protection order was filed in each county and the number of domestic violence cases reported to law enforcement in each county. Mora County had the highest number of protection orders filed in district court relative to the number of domestic violence incidents reported by law enforcement (191%), followed by Taos County (116%), Torrance County (99%), and Eddy County (97%). McKinley County had the fewest number of protection orders filed in district court (14%), followed by Dona Ana County and Bernalillo Counties (24%, respectively) and Lincoln County (26%). See **Figure 21**.

- ▶ The number of protection orders (1,961) that domestic violence victims filed with the assistance of statewide service providers represent 28% of the total domestic violence-related cases for which a protection order was issued in district courts in 2017 (6,958).

▶ Number of Protection Orders Filed by Service Providers 1,961

### III. DISTRICT AND MAGISTRATE COURT FINDINGS

The Central Repository in collaboration with the AOC was able to identify and extract valuable district and magistrate court data regarding new domestic violence charges and cases *filed* in 2017, charges and cases *disposed* in 2017, and the type of disposition outcomes for domestic violence cases. County totals on domestic violence cases filed, and conviction and dismissal rates on domestic violence cases disposed in district and magistrate courts for 2017, are found in *Section Three, Tables M – P*.

Additionally, the Central Repository has obtained new cases of *false imprisonment*, as well as some cases of *harassment, stalking, and aggravated stalking* where the domestic relationship, while likely, could not be confirmed from the documentation provided from the courts. Therefore, these data are presented separately.

#### A. District Courts

##### 1. New Domestic Violence Charges and Cases Filed in District Courts, 2017

There were a total of 2,732 domestic violence charges filed in 1,730 new cases of domestic violence in New Mexico District Courts, in 2017. See **Appendix J** for a list of participating statewide district courts. All charges/cases are against a household member. Battery (1,013) comprised most (37%) of the charges, followed by aggravated battery, 27% (748), aggravated assault, 12% (334), criminal damage to property, 11% (313), assault, 4% (97), violation of a protection order, 4% (98), aggravated stalking, 3% (90), deprivation of property, 1% (16) and assault with intent to commit a violent felony, 1% (22). See **Figure 22**.

One-third (32%) of all domestic violence cases were filed in Bernalillo County. Dona Ana County comprised 11% of domestic violence cases filed in 2017, followed by San Juan County (7%), Curry and Lea Counties (5%, respectively), Otero County (4%), and Santa Fe, Sandoval, Rio Arriba, Eddy and Chaves Counties (3%, respectively). See **Table 28**.

##### 2. Domestic Violence Charges and Cases Disposed in District Courts, 2017

There were 3,109 domestic violence charges disposed in 1,956 cases of domestic violence in New Mexico District Courts in 2017. Of the disposed domestic violence charges, most (41% or 1,271) were battery, followed by aggravated battery, 24% (761), aggravated assault, 12% (375), and criminal damage to property, 10% (317). See **Figure 23** for the proportion of each type of domestic violence crime disposed in 2017.

Forty percent of all domestic violence cases in 2017, were disposed in Bernalillo County. Dona Ana County comprised 10% of disposed domestic violence cases, followed by San Juan County (6%) and Curry County (5%). Chaves, Lea, and Otero counties comprised 4%, respectively of all domestic violence cases disposed in District Courts in 2017. See **Table 29**.

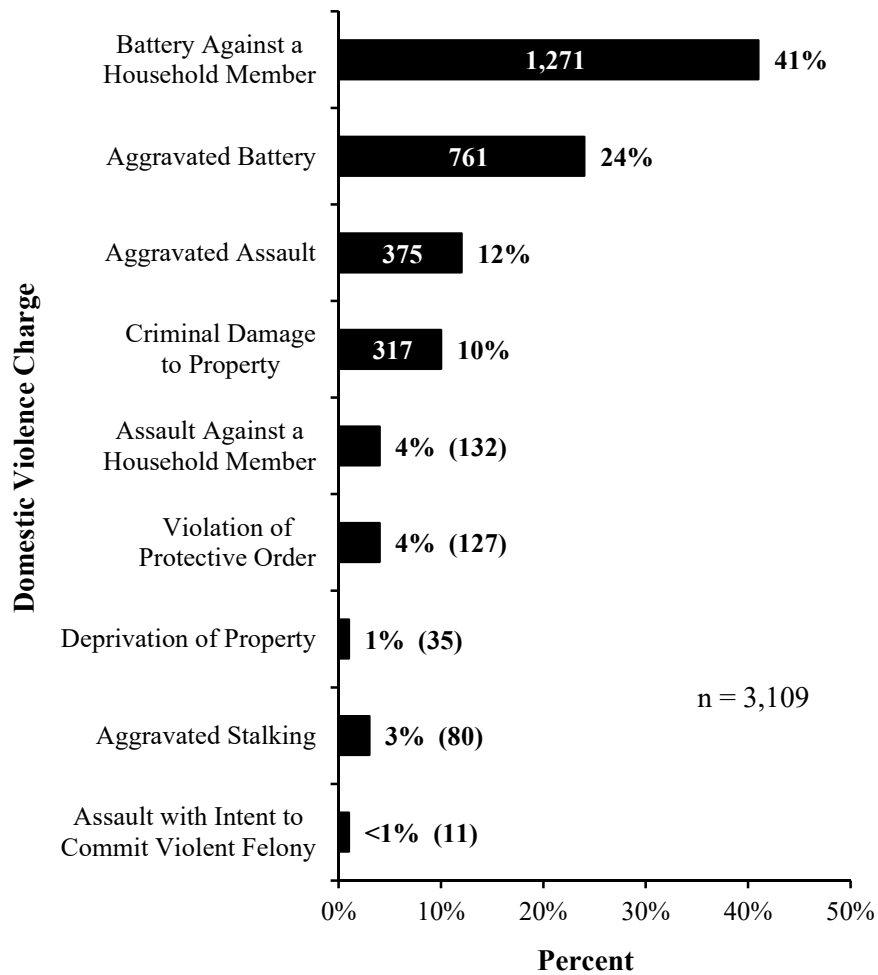

##### 3. Dispositions of Domestic Violence Cases Disposed in District Courts in 2017

Of the 1,956 cases of domestic violence disposed in district courts in 2017, 29% (565) obtained a guilty plea/conviction, 1% (19) obtained an acquittal, 54% (1,065) were dismissed, and 16% (307) had prosecution proceedings that resulted in “other” dispositions (conditional discharges, remands, consent decrees, deferred cases, and transferred cases). See **Figure 24**.

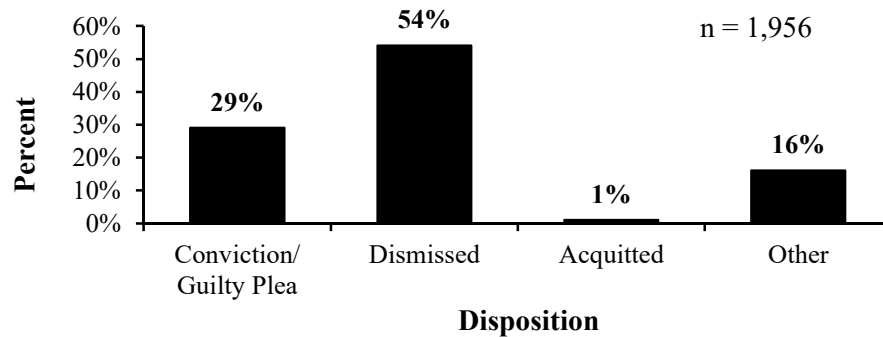

**Figure 22. Percent Domestic Violence Charges Filed in District Courts, 2017**

**Figure 23. Percent Domestic Violence Charges Disposed in District Courts, 2017**

**Figure 24. Percent of Each Disposition of Domestic Violence Cases in District Courts, 2017**

**Table 30** illustrates the number of cases dismissed, convicted, and acquitted for each district court.

An examination of dismissed cases by district court (among courts with 10 or more domestic violence cases) shows that Los Lunas District Court had the highest dismissal rate of its disposed domestic violence cases (71%), followed by Albuquerque District Court (69%), Clayton District Court (67%) and Santa Rosa District Court (63%). See **Table 31** for the percent of domestic violence cases dismissed for all District Courts in 2017.

Similarly, an examination of cases that obtained a guilty plea/conviction by district court (among courts with 10 or more domestic violence cases) shows that Tucumcari District Court had the highest conviction rate of its disposed domestic violence cases (59%), followed by Carrizozo District Court (57%), Grants District Court (56%), Deming District Court (53%) and Alamogordo District Court (52%). Conversely, Albuquerque District Court had the fewest domestic violence cases with a conviction (14%), followed by Bernalillo and Los Lunas District Courts (17%, respectively). See **Table 32** for the percent of domestic violence cases with a conviction/guilty plea for all District Courts in 2017.

## **5. District Court Protection Orders Issued**

In 2017, there were 11,872 protection orders issued by statewide district courts for one or more parties involved in 6,958 new domestic violence-related cases. Of the 11,872 protection orders issued, 2% (221) were emergency protection orders, 75% (8,927) were domestic violence temporary orders of protection, and 23% (2,724) were judgments for permanent protection orders.

Of the 221 emergency protection orders issued in 2017, two-thirds (66% or 146) were issued in Bernalillo County, followed by 19% (43) in Dona Ana County, and 4% respectively, in Taos County (9) and Grant County (8). See **Table 33** for a list of emergency protection orders issued by county.

Of the 8,927 judgments for temporary protection orders issued in 2017, most (23% or 2,010) were issued by Bernalillo County. Lea County issued 12% (1,031) of all permanent protection orders, followed by 7% respectively, in Otero (626), Sandoval (625), Santa Fe (621), and Chaves (601) counties. See **Table 34** for a list of temporary protection orders issued by county.

Of the 2,724 judgments for permanent protection orders of protection issued in 2017, most (30% or 816), were issued by Bernalillo County, followed by Santa Fe County, 9% (255), Valencia County, 8% (225), and Dona Ana County, 7% (182), and 5% respectively in Lea (146) and Sandoval (127) counties. See **Table 35** for a list of domestic violence permanent orders of protection issued by county.

## **6. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Cases Filed in District Courts, 2017**

While most harassment, stalking/aggravated stalking, and false imprisonment charges/cases are domestic-related, in some of the district court cases of these offenses, the victim/offender relationship was not documented to determine whether the offense was domestic in nature. However, the total number of all stalking/aggravated stalking cases, harassment cases, and false imprisonment cases are being presented to provide a credible source on the annual incidence of harassment, stalking/aggravated stalking, and false imprisonment crimes.

Over all, there were 487 false imprisonment cases, 25 harassment cases, and 21 stalking/aggravated stalking cases filed in District Courts in 2017. See **Table 36** for the number of new cases of these crimes filed in each district court.

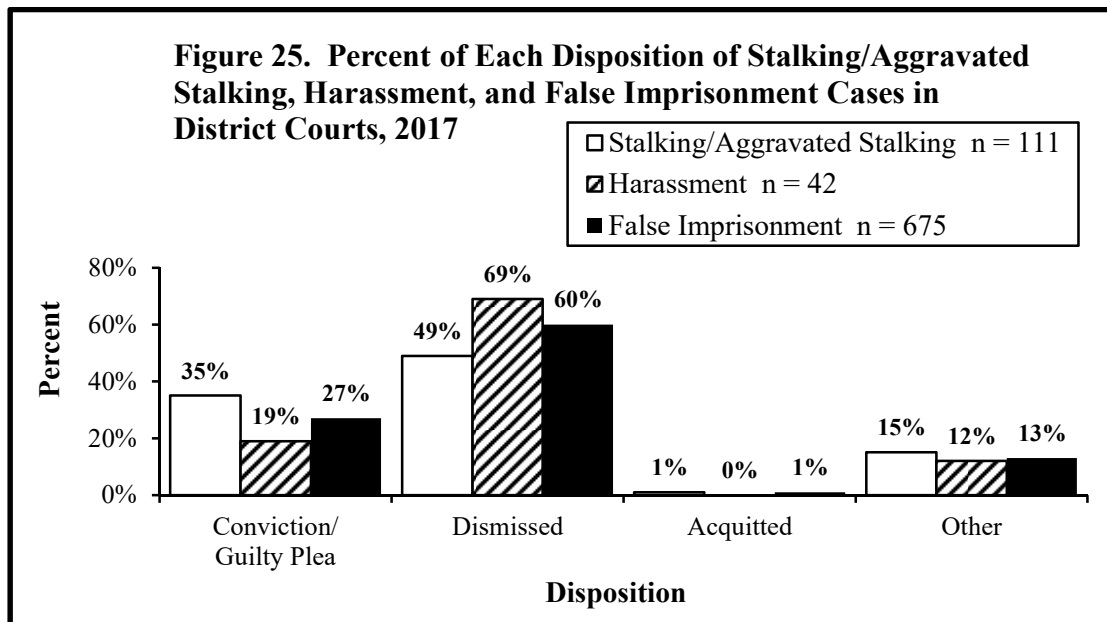

**7. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Cases Disposed in District Courts, 2017**

There were 111 stalking/aggravated stalking cases that were disposed in statewide district courts in 2017. Albuquerque District Court comprised 24% (27) of all the district court stalking and aggravated stalking cases that were disposed, followed by Clovis District Court, 15% (17), Las Cruces District Court, 11% (12), and Roswell (7) and Aztec/Farmington (7) District Courts (6%, respectively). See **Table 37**. Half (49% or 54) of stalking/aggravated stalking cases were dismissed, one-third (35% or 39) obtained a conviction, and 1% (1) obtained an acquittal. Fifteen percent (17) of stalking/aggravated stalking cases resulted in other dispositions: conditional discharge, 9% (10); deferred, 5% (5); remand, 1% (1), and transferred, 1% (1). See **Figure 25**.

There were 42 harassment cases disposed in statewide district courts in 2017. One-fifth, 21% (9) were disposed in Albuquerque District Court, 14% (6) were disposed in Santa Fe District Court, and 12% (5) in Las Cruces District Court. See **Table 38**. Two-thirds (69% or 29) of the harassment cases disposed in district courts were dismissed, 19% (8) obtained a conviction, and 12% (5) resulted in “other” dispositions: deferred, 2% (1), and conditional discharge cases, 10% (4). Refer Figure 25.

There were 675 false imprisonment cases disposed in statewide district courts in 2017. Albuquerque District Court comprised 43% or 287 of the false imprisonment cases that were disposed, followed by Las Cruces District Court, 10% (65), and Aztec/Farmington District Court, 9% (59). See **Table 39**.

Of the 675 false imprisonment cases disposed in district courts, 60% (402) were dismissed, 27% (182) obtained a conviction, and 1% (5) obtained an acquittal. The remaining 13% were cases with “other” dispositions (conditional discharges, deferred charges, bindover, and remand charges), all of which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal. Refer to Figure 25.

**B. Magistrate Courts**

**1. New Domestic Violence Charges and Cases Filed in Magistrate Courts, 2017**

There were a total of 14,500 domestic violence charges filed in 11,902 new cases of domestic violence in New Mexico Magistrate Courts in 2017. See **Appendix K** for a list of participating magistrate courts. All cases/charges are against a household member. Bernalillo County comprised most (34% or 4,090) of all the magistrate-metropolitan court domestic violence cases filed, followed by Dona Ana County, 10% (1,139), San Juan County, 9% (1,023), and Santa Fe County, 7% (847). See **Table 40** for the proportion of new cases filed by each county.

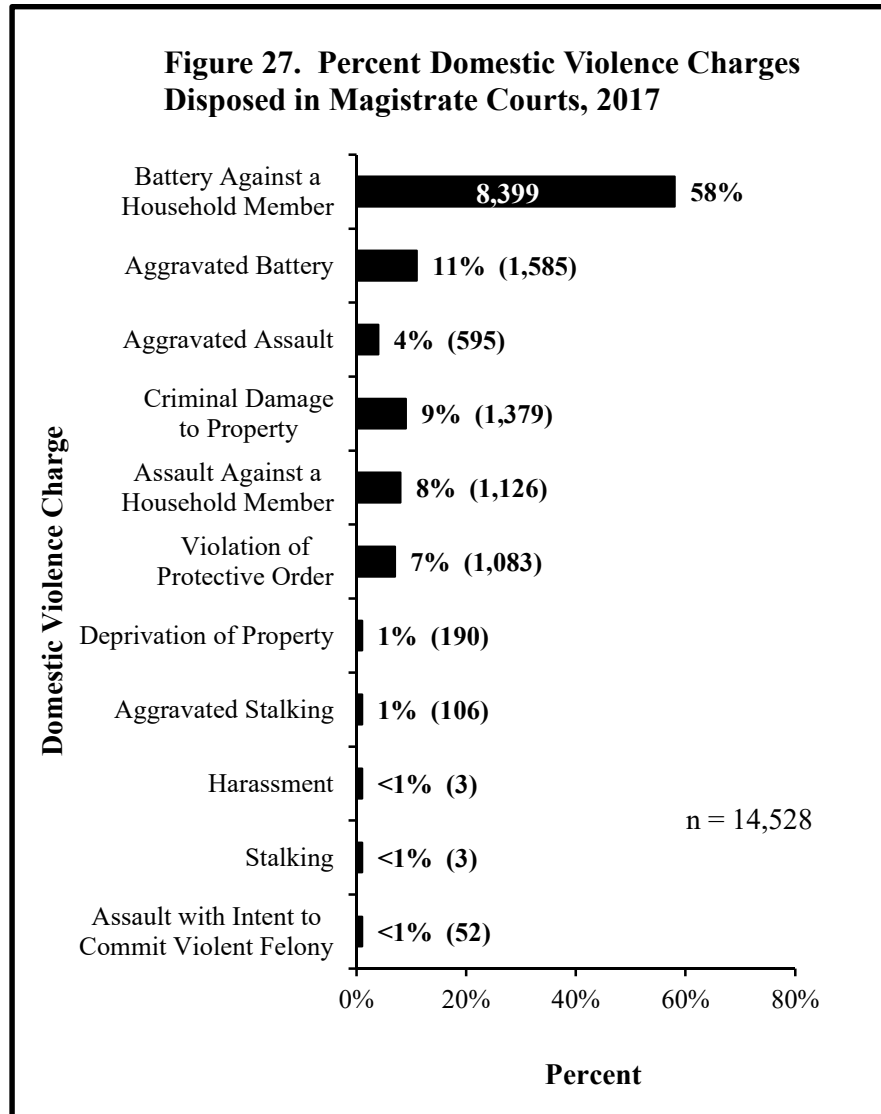

*Battery* comprised most (57%) of the charges, followed by *aggravated battery* (12%), *criminal damage to property* (10%), *assault and violation of a protection order* (7%, respectively), and *aggravated assault* (4%). See **Figure 26**.

## 2. Domestic Violence Cases Disposed in Magistrate Courts, 2017

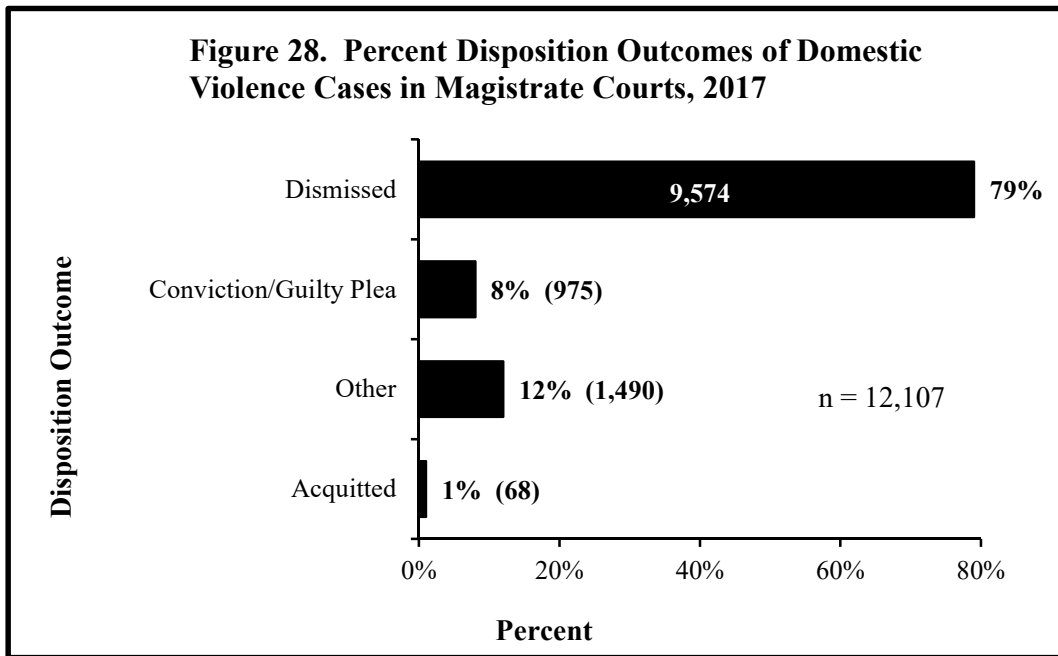

There were 14,528 domestic violence charges disposed in 12,107 cases of domestic violence in magistrate courts in 2017. Of the disposed domestic violence charges, most (58%) were *battery*, followed by *aggravated battery* (11%), *criminal damage to property* (9%), *assault* (8%), and *violation of a protective order*, (7%). See **Figure 27** for the proportion of each type of domestic violence crime disposed in 2017.

Bernalillo County comprised most (42%) of all the magistrate court domestic violence cases disposed, followed by Dona Ana County (9%), San Juan County (7%), and Santa Fe County (5%). See **Table 41** for the proportion of cases disposed by each county.

Of the 12,107 domestic violence cases disposed, 79% (9,574) were dismissed, 1% (68) were acquitted, and 8% (975) obtained a guilty plea or conviction. The remaining 12% were cases with “other” dispositions (deferred cases, transfers, bind over cases, and conditional discharge cases) which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal. See **Figure 28**.

Table 42 illustrates the number of cases dismissed, convicted, acquitted, and other disposition outcomes for each magistrate court.

An examination of dismissed cases by magistrate courts (among courts with 10 or more domestic violence cases) shows that Albuquerque Metropolitan Court and Gallup Magistrate Court had the highest dismissal rates of their disposed domestic violence cases (92%, respectively), followed by Socorro Magistrate Court (91%), and Santa Fe Magistrate Court (90%). Conversely, Deming Magistrate Court had the fewest dismissals (30%), followed Ruidoso Magistrate Court (32%). See Table 43.

Similarly, an examination of cases that obtained a guilty plea/conviction by magistrate court (among courts with 10 or more domestic violence cases) shows that Alamogordo Magistrate Court had the highest conviction rate of its disposed domestic violence cases (40%), followed by Las Vegas Magistrate Court (37%), and Carlsbad and Ruidoso Magistrate Courts (35%, respectively). Conversely, Albuquerque Metropolitan Court had the fewest domestic violence cases with a conviction (1%), followed by Los Lunas, Gallup and Anthony Magistrate Courts (3%, respectively), and Bernalillo, Clayton, Socorro, and Santa Fe Magistrate Courts, with 4% respectively. See Table 44.

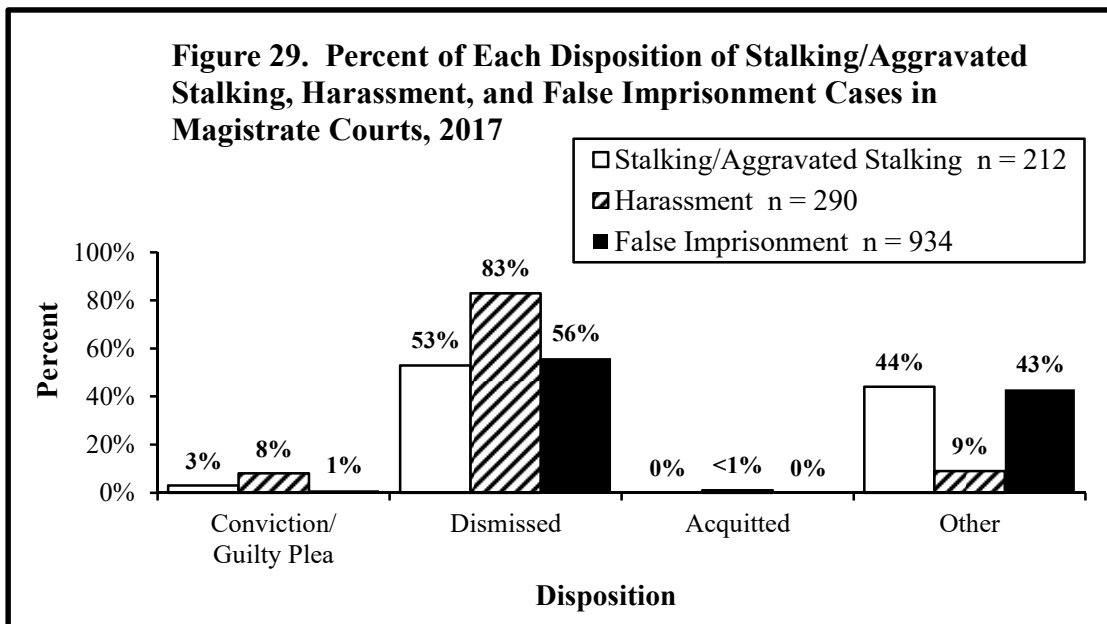

#### 4. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Charges and Cases Filed in Magistrate Courts, 2017

While most harassment, stalking/aggravated stalking, and false imprisonment charges/cases are domestic-related, in some of the magistrate court cases of these offenses, the victim/offender relationship was not documented to determine whether the offense was domestic in nature. However, the total number of all stalking/aggravated stalking cases, harassment cases, and false imprisonment cases are being presented to provide a more credible source on the annual incidence of harassment, stalking/aggravated stalking, and false imprisonment crimes than law enforcement-reported data.

Over all, there were 939 false imprisonment cases, 262 harassment cases, and 129 stalking/aggravated stalking cases filed in Magistrate Courts in 2017. To see how many of each crime was filed in each magistrate court, see Table 45.

## 5. Harassment, Stalking/Aggravated Stalking, and False Imprisonment Cases Disposed in Magistrate Courts, 2017

There were 212 stalking/aggravated stalking cases that were disposed in statewide magistrate courts in 2017. Albuquerque Metro Court comprised 25% (53) of all the magistrate court stalking and aggravated stalking cases that were disposed, followed by Bernalillo Magistrate Court, 8% (18), Las Cruces Magistrate Court, 7% (15), and Belen (13) and Santa Fe (12) Magistrate Courts (6%, respectively). See **Table 46**. Over half (53% or 112) of stalking/aggravated stalking cases were dismissed, and 3% (6) obtained a conviction. See **Figure 29**. Forty-four percent (94) of the stalking and aggravated stalking cases resulted in “other” dispositions: bind over, 26% (56); transferred, 17% (35), and deferred, 1% (3).

There were 290 harassment cases disposed in statewide magistrate courts in 2017. Over one-third, 37% (106) were disposed in Albuquerque Metro Court, followed by Santa Fe Magistrate Court, 9% (26) and Las Cruces Magistrate Court, 7% (20). See **Table 47**. Over three-quarters (83% or 241) of harassment cases disposed in magistrate courts were dismissed, 8% (23) obtained a conviction. Refer to Figure 29. Nine percent (25) of harassment cases resulted in “other” dispositions (deferred cases, 5% (14), conditional discharge cases, (3), bind-over cases, (4), and transferred cases, (4), 1% respectively).

There were 934 false imprisonment cases disposed in statewide magistrate courts in 2017. Albuquerque Metro Court comprised 31% (294) of the false imprisonment cases that were disposed, followed by Santa Fe Magistrate Court, 9% (81), Los Lunas Magistrate Court, 7% (62), and Farmington Magistrate Court 6% (52). See **Table 48**.

Of the 934 false imprisonment cases disposed in magistrate courts, over half (56% or 527) were dismissed and 1% (8) obtained a guilty plea or conviction. Refer to Figure 29. The remaining 43% (391) were cases with “other” dispositions such as bind-over cases, 19% (179), transferred cases, 23% (213), and <1% respectively, of conditional discharge cases (3) and deferred cases (3) which demonstrated prosecution proceedings that did not result in a dismissal, conviction, or acquittal.

## **SECTION TWO: IMPLICATIONS OF THE FINDINGS AND FUTURE DATA NEEDS**

### **A. Identifying Children at Risk**

Service providers reported that children were present at one out of every 3.3 domestic violence incidents in 2017, and 79% of them were under the age of twelve. The ASD revealed that children who witness abuse are four times more likely to experience child abuse, than children who do not witness abuse. It further found that most (62%) abused children experienced multiple types of abuse, most typically at the hands of a family member (84%); and those abused as children have poorer health outcomes. Survivors abused as children compared to those not abused were six times more likely to be abused as an adult, four times more likely respectively, to be told they have a mental illness and attempt suicide, and three times more likely respectively, to think about suicide and be told they have a substance abuse problem. The children served by statewide service providers (2,789) represent 41.5% of the number present at the scene of domestic violence incidents as reported by law enforcement (6,718). These numbers represent only children in domestic violence cases that are reported. With so much at stake, it is imperative that greater effort be made (protocols for coordinated community response and systems in place) to better identify children that witness child abuse and ensure participation in appropriate counseling services for assessment and treatment.

### **B. Poverty and Violence**

Most of the battered women who go to a domestic violence service provider for shelter and/or other services are poor. Since there is no way to capture the number of survivors with financial means who access private services, and/or who travel out of state for services, it is not possible to determine the true proportion of survivors among all battered women who are poor. However, the ASD found that most unmarried survivors with children and those without children who went for domestic violence services in New Mexico meet federal poverty level requirements for 150% and 133% of income, as well as the more restrictive federal poverty income level.

Almost two-thirds (60%) of survivors reported that they left a violent relationship at some time. Of these, one-third (32%) reported that they returned. Reasons for returning to their abuser in the order of most mentions include, returned: *to try to work it out, for the children, and because I was scared*. A central core of the consideration for returning “for the children” is finances. Among the descriptions for scared is “no support/lack of resources”. Indeed, the ASD revealed that survivors who left a violent relationship and did not return had a median annual income \$2,080 greater (\$12,000) than those who left and returned (\$9,920). It further found that only 42% of survivors who are eligible/receive Medicaid/TANF assistance live in their own apartment or home. Most live in shelter (23%), with a friend (29%), transitional housing (1%), or on the street (3%).

Of survivors who were involved in a prior domestic violence experience, 43% reported that they live with an offender with whom they have had a prior domestic violence incident. When examined by income, survivors who live with an offender with whom they have had a prior domestic violence experience had a median annual income of \$2,400 less (\$9,600) than survivors who do not live with an offender with whom they have had a prior domestic violence experience (\$12,000).

All of this points to the reality of the role that poverty plays in an individual’s vulnerability to living in violence. Greater emphasis must be pointed toward providing basic housing, food, clothing, transportation, and access to employment and health care for victims and their families to allow them to leave and stay away from a violent environment.

### **C. Mental Illness and Health and Safety Risk**

Survivors with a parent with mental illness were twelve times more likely than other survivors to be told they have mental illness. Survivors with mental illness were five times more likely than survivors without to be told they have a substance abuse problem and two times more likely respectively, to have used alcohol/drugs during a domestic violence incident and to be injured during a violent incident. These data have implications for investigating the plausibility of developing a system for at-scene referral to mental health agencies to evaluate survivors for mental illness, both for their own sake, and the sake of their children's future health and safety.

### **D. Injury Risk Factors**

Law enforcement agencies reported that 41% of the domestic violence incidents in 2017 involved injury to the victim. They do not document or report injury to children. Service providers reported that 38% of survivors and 23% of children were injured in domestic violence cases that came to their attention.

From the ASD, among the types of abuse reported by the 89% of survivors who reported abuse by an intimate partner, are *physical attack* (60%), *physical restraint* (29%), *threatened to be harmed or killed* (34%), *strangulation* (12%), *sexual assault* (11%) and *involvement of a lethal weapon* (12%). Twenty percent of children present during these abusive incidents suffered the same types of abuse.

The ASD revealed that survivor risk of injury increased among survivors: a) with a substance abuse problem; b) with a mental illness; c) involved in a prior domestic violence incident; d) ever abused while pregnant; e) who are female; or f) who are Native American. This information has implications for law enforcement for assessing risk of harm to the survivor and children at the scene, and for service providers when developing safety plans with survivors.

### **E. Substance Abuse and Risk**

As with mental illness, survivors who were told they have a substance abuse problem compared to those without, were two times more likely respectively, to have used alcohol/drugs during a domestic violence incident, to be involved in an incident where the abuser used alcohol/drugs, and to be injured during a domestic violence incident. Additionally, survivors with an substance abuse problem were two times more likely than those without a substance abuse problem to think about suicide, and four times more likely to attempt suicide. This information has implications for providing access to substance abuse treatment for survivors.

### **F. Evidence Supporting the Focus on Early Intervention to Prevent Domestic Violence**

In 2017, two-thirds (65%) of the law enforcement incidents documenting the victim/offender relationship, were perpetrated by a current or former intimate partner, 48% of these by current or former boyfriends/girlfriends who are or were dating or living together. Similarly, 82% of adult victims who sought services from a domestic violence service provider were assaulted by a current or former intimate partner, 30% of these were dating or living together. The NISVS State Report found that 37.3% of women and 33.3% of men in New Mexico were victims of intimate partner violence in their lifetime. Further, nationally 7.1% of women who were lifetime victims of intimate partner violence and 3.7% of men who were lifetime victims of intimate partner violence were victimized before age 18. In New Mexico, 6.9% of women lifetime victims of intimate partner violence were victimized before age 18. Further, stalking behaviors begin in adolescence and the reported incidence of adolescent stalking is almost twice that of adolescent intimate partner violence. The

high proportion of interpersonal violence cases perpetrated by adolescent offenders, demonstrates that true prevention requires early education initiatives on building healthy relationships during adolescence.

### **G. Sexual Assault Prevention and Treatment for Domestic Violence Child and Adult Victims**

In 2012, the ASD found many children experienced sexual abuse (8%) at the hands of their adult-victim's offender. Similarly in 2017, 17% of adult domestic violence victims seeking counseling services and 7% of children were sexually assaulted by their offender.

The NISVS State Report reported that 16.5% of women in New Mexico that were ever victims of intimate partner violence, experienced contact sexual violence (rape and/or unwanted sexual contact) by their intimate partner. This suggests that effective prevention and treatment programs for domestic violence victims must include components of sexual assault prevention and treatment or must provide referrals to appropriate sexual assault services.

### **H. Interpersonal Violence Prevention and Advocacy for Males**

In New Mexico in 2017, 29% of domestic violence victims identified by law enforcement were males. The NISVS State Report found that 33.3% of New Mexico men were victims of intimate partner violence in their lifetime. More outreach must be done to identify male victims of interpersonal violence and offer prevention and treatment programs specific to males.

### **I. Providing Offender Treatment Programs**

In New Mexico, 73% of suspects identified by law enforcement and 79% of offenders identified by domestic violence service providers in 2017, were male. Nationally, the NCVS found that 95.7% of female victims of intimate partner violence and 16% of male victims of intimate partner violence, had a male offender. (Criminal Victimization, 2011). Further, findings from the NISVS State Report revealed that in 84.8% of lifetime stalking victimizations with female victims and 43% of lifetime stalking victimizations with male victims had a male offender. Perhaps greater outcomes in domestic violence prevention may be realized through greater availability of offender prevention and therapeutic programs that include strategies for addressing aggression in male socialization.

### **J. Evidence Supporting the Need to Identify Domestic Violence Victims in the Healthcare Setting**

In 2017, law enforcement reported that 41% of adult victims were physically injured during a domestic violence incident. Similarly, statewide service providers reported that 38% of adults and 23% of children were physically injured by the adult victim's offender during a domestic violence incident. The NISVS State Report stated that an average 30.8% of women victims of intimate partner violence and 13.4% of men victims of intimate partner violence each year nationally, were injured. Additionally, an average 15.3% of women and 6.2% of men each year required medical care for their injuries. This suggests that New Mexico healthcare facilities may play an important role in both, the identification of domestic violence victims and their referral to appropriate services.

Patients that are seen in the healthcare/emergency room setting with a domestic violence-related injury are typically not reported to law enforcement and represent a substantial gap in reporting. While many healthcare facilities use screening tools to identify patients who are victims of domestic violence, no standardized monitoring system to reliably document the number of these individuals currently exists.

Methods to determine healthcare utilization by victims of violence through e-codes or billing databases have been unsuccessful and are unreliable at best, due to definitional problems of the codes, practitioner discretion and inconsistencies in naming injuries, and the insurance-related intentions of billing databases. The need to rectify these problems is underscored by findings from the NISVS State Report which revealed substantial comorbidity with intimate partner violence victims with regard to chronic physical and mental health problems. Among women victims of intimate partner violence, 6.2% reported poor physical health compared to 3.0% of women with no history of violence. Similarly, among women victims of intimate partner violence, 3.6% reported poor mental health compared to 1.1% of women with no history of violence.

The process for collecting standardized domestic violence data from statewide medical facilities is not yet established. Since many times the first, and perhaps only contact a victim may have with the "helping system" is through a hospital emergency department or physicians' office, this creates a significant void in the Central Repository data and represents a major obstacle in accurately defining the scope and nature of domestic violence in our state. Moreover, until better protocols are established for identifying patient visits associated with interpersonal violence, a significant portion of the total cost of interpersonal violence to individuals, their communities, and the state cannot be estimated.

### **K. Evidence Supporting the Need for Culturally Competent Services for Native Americans**

Native Americans are nearly three times (11%) more represented among the victimized population of domestic violence survivors served at Albuquerque SANE than their representation in the Bernalillo County population (3.9%). This rate of victimization-representation to population-representation is greater than all other non-multiracial persons: Blacks (2.0 times); Hispanics (1.2 times); White [non-Hispanics] (-1.68 times); and other race/ethnicity (1.0 times). This is consistent with the NISVS State Report finding that intimate partner victimizations of Native American women were significantly more represented than other races/ethnicities in the victimized population of lifetime intimate partner violence nationally. A reported 47.5% of American Indian/Alaska Native women, 45.1% of non-Hispanic Black women, 37.3% of non-Hispanic White women, 34.4% of Hispanic women, and 18.3% of non-Hispanic Asian or Pacific Islander women experienced intimate partner violence in their lifetime.

The NISVS State Report does not provide a rate of lifetime intimate partner violence among Native Americans in New Mexico, nor the rate of intimate partner violence in the preceding 12 months to obtain an annual incidence estimate. Outside of municipal and county jurisdictions, there is no formalized process in place to capture the incidence of reported or unreported victimizations of Native Americans. It is recommended that such a process be established to improve the identification of Native American survivors to: a) enable survivors to be referred to appropriate services, b) increase investigation and prosecution of intimate partner crimes against Native Americans, c) improve the safety of Native American families and communities, and 4) obtain data to justify the need for funds to improve prevention, as well as New Mexico's response to Native American victimizations.

### **L. Evidence Supporting the Need for Better Court Data on Domestic Violence**

Within the last five years, the Central Repository has worked with the AOC to obtain better quality data on interpersonal violence crimes. This effort has led to an expansion of the domestic violence crimes captured, which now include false imprisonment, criminal damage to property, deprivation of property, harassment, and violation of a restrictive order, in addition to the more typical battery/aggravated battery, assault/aggravated assault and stalking/aggravated stalking charges.

Still, quality protection order information is needed to determine the efficacy of protection orders, emergency protection orders, their rate of enforcement, and the consequences for violating protection orders for offenders and victims.

It is important to obtain better court data because evidence of currently available data demonstrates that there has been a steady decrease in the rate of domestic violence convictions in statewide district and magistrate courts. In 2017, the conviction rates of disposed domestic violence cases in district (29%) and magistrate courts (8%) are among the lowest rates of conviction over the last eight years.

Without better data from the courts, vital information such as why the dismissal rate in domestic violence cases has increased and why the rate of conviction for domestic violence cases has decreased, remains unknown. Answers to these questions will serve to improve the efficacy of legal advocacy for domestic violence victims.

## **M. Stalking Underreporting, Training, and Victim Referral**

New Mexico first enacted its stalking statute in 1997. In 2009, the legislature amended the definition of “pattern of conduct” in the statute to reflect the variety of behaviors stalkers were employing in cases across the state, including the use of technology. *N.M. Stat. Ann. § 30-3A-3(2010): (2) "pattern of conduct " means two or more acts, on more than one occasion, in which the alleged stalker by any action, method, device or means, directly, indirectly or through third parties, follows, monitors, surveils, threatens or communicates to or about a person.* The new statute also included a court ordered program intervention as part of the punishment for a convicted stalker, “*D. In addition to any punishment provided pursuant to the provisions of this section, the court shall order a person convicted of stalking to participate in and complete a program of professional counseling at the person's own expense or a domestic violence offender treatment or intervention program.*” The statute change in aggravated stalking was believed to be the most promising in law enforcement’s efforts to establish a stalking charge as it allowed a charge of aggravated stalking if a perpetrator merely violated an existing order of protection or conditions of release: *N.M. Stat. Ann. § 30-3A-3.1 2010): Aggravated stalking. A. Aggravated stalking consists of stalking perpetrated by a person: (1) who knowingly violates a permanent or temporary order of protection issued by a court, except that mutual violations of such orders may constitute a defense to aggravated stalking; (2) in violation of a court order setting conditions of release and bond.*

Even with new stalking policies, there are still too few cases of stalking recognized and charged as such by law enforcement agencies throughout the state. Nationally, the NISVS found that 19.0% of women and 6.1% of men were victims of stalking in their lifetime. Nationally from 2010-2012, the NISVS found that an average 4% of adult women each year and an average 1.9% of adult men each year were victims of stalking. If we used the national annual rate to estimate the number of women stalking victims in New Mexico in 2012, it would mean that there were an estimated 33,610 women stalking victims that year (800,247 women [18 and over] x 4.2%). Similarly, if we used the national annual rate to estimate the number of men stalking victims in New Mexico in 2012 (770,669 men [18 and over] x 1.9%), it would mean that there were an estimated 14,642 men stalking victims that year. Therefore in 2012, there would be an estimated 48,252 stalking victims in New Mexico. The most stalking cases identified in New Mexico in 2012 was 312 reported by statewide district and magistrate courts. Statewide law enforcement agencies that year reported 68 total cases. In 2017, 150 new stalking and aggravated stalking cases were filed in New Mexico district and magistrate courts; and statewide law enforcement agencies identified 145 stalking victims.

There are numerous administrative and procedural issues that affect accurate reporting of domestic violence and stalking incidents ranging from whether and how police offense incident reports are written to how these reports are entered into law enforcement databases or otherwise counted.

The issues surrounding identification of stalking incidents and victims present obstacles for victims to obtain access to the necessary safety and advocacy services for themselves and their children. This is explained in part by the fact that most stalking cases are labeled other crimes (harassment, vandalism,

destruction of property, arson, trespassing, car theft, etc.) and are therefore not captured. The failure to differentiate between stalking victims and victims of isolated crimes means that many stalking victims are not getting referred for appropriate services. This is a significant problem because interpersonal violence crimes many times co-occur. The NISVS found that 68.1% of women and 64.7% of men stalking victims in the prior 12 months of the survey experienced threats of harm; and 61.5% of women and 42.8% of men in the prior 12 months were stalked by an intimate partner. These victims and their children are at greater health and safety risk and need to be referred for appropriate services; and these types of referrals are not likely to happen as a result of a trespass, vandalism, or other similarly labeled, isolated crime incident.

It is imperative to provide necessary training to all law enforcement officers, administrative personnel, and executive personnel whose policies guide law enforcement procedure regarding the description, documentation, and data entry of stalking crimes, and referrals of stalking victims to appropriate services.

### **Closing Comments**

The aforementioned improvements will ultimately be required to answer the type of domestic violence questions that are most critical in guiding public policy decisions, program development, and the most effective allocation of resources. To this end, the Central Repository Director will continue to pursue collaborations with statewide agencies (both current participants and non-participants) and the NM Department of Health and the Department of Public Safety to develop a process for enhancing the present data collection system.

**INCIDENCE AND NATURE OF DOMESTIC VIOLENCE IN NEW MEXICO XVII:  
An Analysis of 2017 Data from  
The New Mexico Interpersonal Violence Data Central Repository**

*APPENDICES*

## Appendix A: Life Experiences of Adult Survivors of Domestic Violence

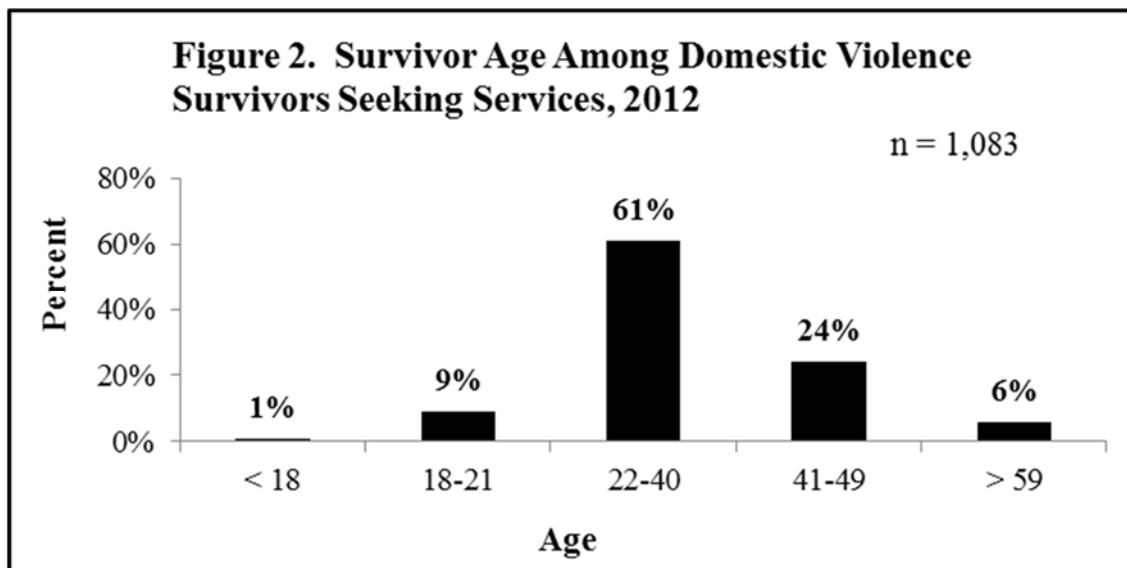

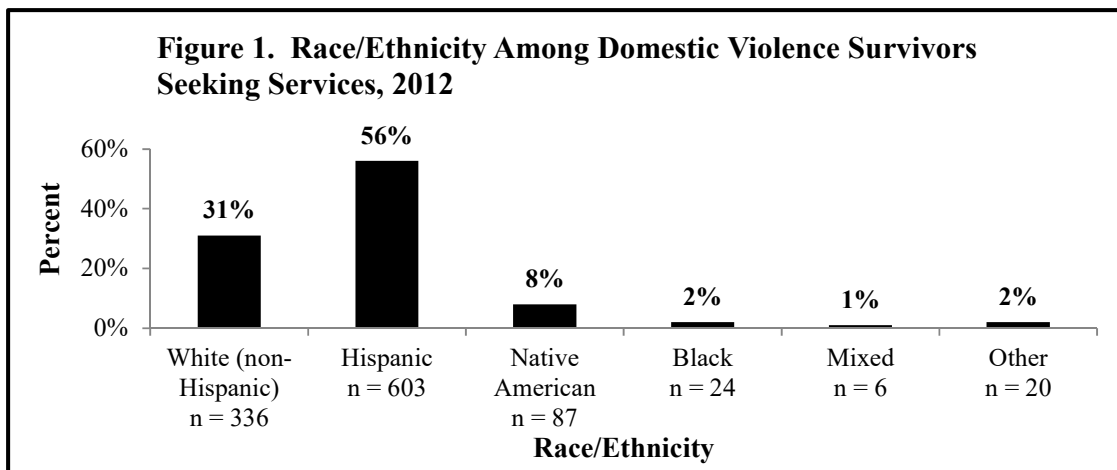

The Adult Survivor Database (ASD) was developed to capture research information on individual domestic violence survivors who seek assistance from statewide domestic violence service providers. In 2012, eleven statewide service provider agencies began using the ASD. For calendar year 2012, there were 1,101 records available for analysis.

### I. FINDINGS

#### A. Demographics

##### 1. Survivor Gender, Race, Age, Sexual Orientation, Marital Status, and Language

Most domestic violence survivors were female (93%), Hispanic (56%) (see **Figure 1**), with a median age of 33 (see **Figure 2**). Sexual orientation was reported on only one-third (38%) of survivors, of which 95% were self-identified as heterosexual, 3% bisexual, and 2% lesbian. Marital status was not directly captured. However, when the survivor's relationship with the current abuser was documented, 27% were married and 6% were divorced.

One-quarter (24%) of domestic violence survivors speak a first language other than English. See Table A. A greater proportion of Spanish speaking survivors than survivors speaking other languages reported having difficulty with English: two-thirds (66%) of Spanish speaking survivors reported having difficulty with English, compared to 37.5% of Native speaking survivors, 7% of survivors of "other" languages, and 1% of English speaking survivors.

Table A. Survivor First/Preferred Language

First/Preferred Language	Number of Survivors	Percent Survivors
English	571	76%
Native American	8	1%
Other	15	2%
Portuguese	1	0.1%
Sign Language	3	0.4%
Spanish	149	20%
Total	747	100%

## 2. Survivor Education Level

Education level was reported for 478 survivors. Of these, 84% achieved a high school equivalent or higher education level. One-third (32% or 154) went to college or graduate school. Of 154 who went to college or graduate school, 79 (51%) completed their degree.

Education level was documented on too few Asian survivors (0), Black survivors (9), Pacific Islander survivors (1), survivors of mixed race (3) and survivors of "other" races (9) to validly examine. Among races/ethnicities that can be compared, 93% of Native Americans, 89% of Whites (non-Hispanic), and 79% of Hispanics completed high school or a higher level of education. Half (50%) of Native American survivors completed college or graduate school, compared to 38% of White (non-Hispanic) survivors and 26% of Hispanic survivors. **See Figure 3.**

## 3. Survivor Income

Slightly over one-third (39%) of survivors were enrolled in Medicaid (430), 13% (148) received TANF Assistance, and 11% (119) were involved in both programs. An examination of income by survivor race/ethnicity among those with a minimum of 20 survivors, reveals that "other" race was the one with the greatest proportion of survivors enrolled in Medicaid (60%), followed by Native Americans (48%), Blacks (46%), Hispanics (42%), and Whites (non-Hispanic) (31%). Native American survivors comprised the race with the greatest proportion receiving TANF assistance (20%) and involved in both Medicaid and TANF programs (16%). **See Figure 4.**

Of 687 survivors whose income was reported, the median income was \$11,000. Most (mode) survivors reported a yearly income of \$12,000. The average income was \$20,606.

There were 642 survivors *not* eligible or receiving financial assistance (TANF and Medicaid). Of these, income was reported for 370 survivors. The median income was \$15,500. Most (mode) survivors not eligible or receiving financial assistance reported an income of \$15,000. Their average income was \$25,118.

There were 459 survivors who were eligible or receiving financial assistance. Of these, income was reported for 317 survivors. The median income was \$10,000. Most (mode) survivors eligible or receiving financial assistance reported an income of \$12,000. Their average income was \$15,339. See **Figure 5**.

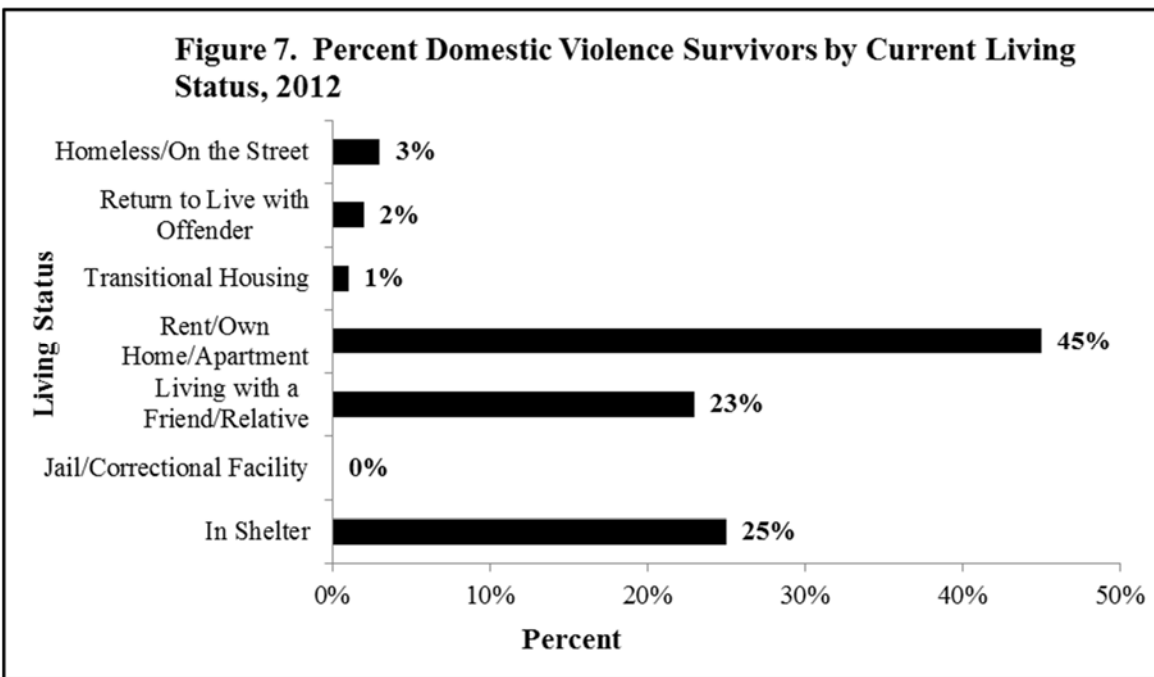

Those survivors *not eligible/not receiving* financial assistance had a median income 50% higher, and an average income 64% higher, than those eligible/receiving assistance. However, the mean income of all survivors eligible/receiving or not, is \$11,000 - 4% below the federal poverty guideline’s level of poverty for an individual (\$11,490); and well below the 133% (\$15,282) to 150% (\$17,235) of their income to qualify for federal assistance programs. In fact, 71% (490) of the 687 survivors with income reported had an actual income that would qualify them for federal assistance programs at the higher threshold of 150% of income, and 66% (456) would qualify for federal assistance programs at 133% of income.

An examination of income by race/ethnicity reveals that White (non-Hispanic) survivors reported the highest income (mean = \$20,653; median = \$12,000), followed by Hispanic survivors (mean = \$17,667; median \$12,000), survivors of “other” races (mean = \$11,347; median = \$10,326), Native American survivors (mean = \$10,947; median = \$8,868) and Black survivors (mean = \$11,542; median = \$8,382). See **Figure 6**.

**4. Survivor Living Status**

Over half (55%) of survivors did *not* live in their own rented apartment or own a home: 25% lived in shelter, 23% lived with a friend or relative, 3% were homeless/ living on the street, 2% lived with the offender, and 1% lived in transitional housing. See **Figure 7**.

When living status was examined by survivor income, significantly fewer survivors who need financial assistance live in an apartment or their own home: over half (57%) of survivors not eligible/not receiving financial assistance (TANF or Medicaid) live in a rented apartment or own home, compared to 42% of survivors who are eligible/receive assistance. Similarly, a significantly greater proportion (29%) of those eligible/receiving assistance, than those not eligible/not receiving assistance (15%), live with a friend or relative. See **Figure 8**.

## B. Survivor Family of Origin and Childhood Experiences

### 1. Witnessing Family Violence As A Child and Child Abuse

One-third of domestic violence survivors reported that they witnessed family violence as a child. Children who witnessed family violence were four times more likely (59%) to experience child abuse than children who did not witness family violence (14%).

Over one-quarter (29%) of survivors reported actually being abused as a child. More female survivors reported witnessing (35%) and experiencing (30%) family violence, than male survivors (24% and 17%, respectively). However, this rate difference between genders should be viewed with caution as the number of male domestic violence survivors is relatively few (75).

When witnessing abuse and experiencing child abuse were examined by race/ethnicity, more Black survivors (58%) reported witnessing abuse, and more survivors of “other” races (50%) reported experiencing actual abuse. Fewer Hispanic survivors than survivors of all other races, reported witnessing (30%) or experiencing (23%) child abuse. See **Figure 9**.

Of 322 victims abused as a child, 304 specified the type of abuse experienced. Of these, 68% (208) experienced physical abuse, 68% (206) emotional abuse, and 50% (153) sexual abuse as a child. One-quarter (26% or 80) of victims experienced all three types of abuse. One-third (31% or 95) experienced physical and sexual abuse; one-half (52% or 158) experienced physical and emotional abuse; and one-third (30% or 90) experienced sexual and emotional abuse.

## **2. Parental substance abuse and mental illness**

Nine percent (103) of domestic violence survivors reported growing up with a parent with a substance abuse problem. Five percent (55) of domestic violence survivors reported growing up with a parent with a mental illness.

Domestic violence survivors with a parent with mental illness, than survivors with a parent without mental illness, were 8 times more likely to also have a parent with a substance abuse problem: over half (58%) of survivors with a parent with mental illness compared to 7% of survivors with a parent without mental illness, reported having a parent with a substance abuse problem.

## **3. Child/Abuser relationship**

Of 322 victims abused as children, 232 reported the relationship to their abuser. Of these, 84% (195) were abused by a family member, 25% (58) by a non-family member, and 3% (8) by a stranger. One survivor (.04%) was abused by a family member, non-family member, and a stranger; 24 (10%) were abused by both a family member and non-family member. Three survivors (1%) were abused by a family member and a stranger; and 3 (1%) were abused by a non-family member and a stranger.

Among survivors who experienced child abuse, there was a slight difference in the victim/abuser relationship and the likelihood to have suicide thoughts and attempt suicide. One-third (30%) of survivors abused as children by a family member thought about suicide and 21% attempted suicide. Similarly 28% of survivors abused as children by a non-family member thought about suicide and 17% attempted suicide.

## **4. In Shelter as A Child**

One percent (16) of domestic violence survivors reported being in a domestic violence shelter as a child. As this number is so few, it cannot validly be examined by other factors.

### **C. Survivor Risk Factors**

#### **1. Survivor Substance Abuse and Mental Illness**

Overall, six percent (69) of domestic violence survivors were told they have a substance abuse problem. Six percent (63) of female survivors and eight percent (6) of male survivors reported being told they have a substance abuse problem.

Thirteen percent of survivors were told they have a mental illness. In this analysis with few (75) male survivors, slightly more males (15%) than females (13%) were told they had a mental illness.

When survivor substance abuse and mental illness were examined by race/ethnicity, more survivors of “other” races, reported mental illness (35%) and having a substance abuse problem (25%) than survivors of all other races/ethnicities. See **Figure 10**. As there are relatively few survivors of “other” races (20) and Black survivors (24), these findings should be viewed with caution.

Survivors abused as a child (12%) were three times more likely than survivors who did not experience child abuse (4%), to be told they have a substance abuse problem.

Survivors abused as a child (26%) were four times (3.7) more likely than survivors who did not experience child abuse (7%), to be told they have a mental illness.

Survivors told they have a mental illness were five times more likely than survivors without mental illness to have a substance abuse problem: Of 142 survivors told they have a mental illness, 28 (20%) were also told they have a substance abuse problem. Of 959 survivors not told they have a mental illness, 41 (4%) have been told they have a substance abuse problem.

Five percent of survivors reported having a parent with a mental illness. However, survivors who were told they have a mental illness were 12.5 times more likely (25%) to have a parent with mental illness, than survivors without mental illness (2%).

**2. Suicide Ideology and Attempts**

Overall, 15% (168) of domestic violence survivors thought about suicide, and 9% (98) reported at least one suicide attempt. When examined by gender, more female survivors, 16% (162), than male survivors, 7% (5) reported thinking about suicide; and more female survivors, 9% (96), than male survivors, 3% (2) reported at least one suicide attempt.

When suicide ideology and attempts were examined by race/ethnicity, slightly more survivors (25%) of “other” races thought about and attempted (15%) suicide than all other races/ethnicities. See **Figure 11**. As there are relatively few survivors of “other” races (20) and Black survivors (24), these findings should be viewed with caution.

Those abused as a child were three times more likely than those not abused to report thinking about suicide: of 322 victims abused as children, 30% (96) reported that they thought about suicide. Of 779 not abused as children, 9% (72) thought about suicide.

Those abused as children were four times more likely (19%) than those not abused (5%) to attempt suicide.

**Figure 11. Percent Domestic Violence Survivors That Thought About and/or Attempted Suicide, by Race/Ethnicity, 2012**

Survivors who experienced emotional abuse, alone or in combination with physical and/or sexual abuse were more likely to attempt suicide than those who did not experience emotional abuse. While more survivors who suffered sexual abuse thought about suicide (among survivors who reported only one type of abuse), slightly more survivors who reported experiencing emotional abuse (24%) attempted suicide, than those who reported sexual abuse (21%), or physical abuse (11%). See Figure 12.

**Figure 12. Percent Domestic Violence Survivors Who Reported Experiencing One Type of Child Abuse and Thinking About or Attempting Suicide, 2012**

Similarly, more survivors who suffered a combination of abuses which included emotional abuse, thought about and attempted suicide than survivors of physical and sexual abuse. See **Figure 13**.

Domestic violence survivors with a parent with mental illness were six times (42%) more likely to have attempted suicide, than survivors with a parent without mental illness (7%).

## D. Adult Domestic Violence Experiences

### 1. Prior Adult Domestic Violence Experience

Over half (57%, 628) of survivors reported having a prior domestic violence experience as an adult. Of these, three-quarters (72% or 455) were involved in a prior domestic violence experience with the same offender, 21% with a different offender, and 11% (68) with both the same offender and a different offender.

### 2. Prior In-Shelter Experience

Sixteen percent of survivors reported being in shelter before as an adult. Of these 179 victims in shelter before as an adult, 163 reported the number of times. Over one-third (39%) were in shelter two or more times.

Among race/ethnicities with a minimum of 20 survivors, “other” races comprised the race/ethnicity with the greatest proportion of survivors (40%) who reported being in shelter before as an adult, followed by Black survivors (25%), Native American survivors (22%), White (non-Hispanic) survivors (16%), and Hispanic survivors (14%). See **Figure 14**.

It requires further study with a greater number of survivors, but being in domestic violence shelter as a child may be a good predictor of being in domestic violence shelter as an adult. Those in this analysis who were in a domestic violence shelter as a child were four (3.9) times more likely than those not sheltered as a child, to be in a domestic violence shelter as an adult: of 16 victims in shelter as a child, 62.5% (10) were in shelter also as an adult; of 1085 victims not in shelter as a child, 16% (169) were in shelter as an adult. As stated, these findings on the relationship between being in shelter as a child and being in shelter as an adult should be viewed with caution as they are based on only 16 survivors in this analysis.

### 3. Survivor/Abuser Relationship

*Current or former intimate partners* were the abuser in 84% of the survivor domestic violence cases. *Current or former boyfriends* comprised the relationship with the greatest proportion of abusers (45%), followed by *current and former spouses* (33%). *Ex-girlfriends* and *girlfriends* comprised 6% of abusers, and *family members* comprised 9%.

Females (86%) were more likely to be abused by an intimate partner than males (70%). Males (20%) were significantly more likely to be abused by a family member than females (9%).

While an equal proportion of survivors lived with their abuser as did not live with their abuser (50%), significantly more female survivors (52%) than male survivors (37%) lived with their abuser.

When examined by income, those survivors who live with their abuser reported an annual median income of \$2400 less (\$9,600) than those who do not live with their abuser (\$12,000).

### 4. Domestic Violence Incidents Involving Survivor Substance Abuse

Twelve percent (137) of domestic violence survivors reported using alcohol/drugs during the domestic violence incident.

Survivors reported that abusers used alcohol/drugs in four times (53%) as many domestic violence incidents as incidents where survivors used alcohol/drugs (12%). Survivors who used alcohol/drugs during the domestic violence incident were two (1.8) times more likely (84%) than survivors who did not use alcohol/drugs (48%) to be involved in an incident where their abuser used alcohol/drugs.

Survivors reported that the abuser used alcohol/drugs significantly more in domestic violence incidents with female victims (54%), than male victims (45%).

Domestic violence survivors who were told they have a substance abuse problem, were five times (4.8) more likely to have used alcohol/drugs during the domestic violence incident (48%) than survivors without a substance abuse problem (10%).

Domestic violence survivors told they have a mental illness, were twice as likely to have used alcohol/drugs during the domestic violence incident (22%), than survivors without a mental illness (11%).

## **5. Type of Abuse/Violence Experienced from The Abuser**

Survivors abused as children are six times more likely to experience abuse in an adult domestic violence incident, than survivors who were not abused as children: of 978 survivors who reported abuse in a recent or past domestic violence incident, 32% (316) reported experiencing child abuse; of 123 survivors who reported no abuse in a past or recent incident, 5% (6) reported experiencing child abuse.

In all, there were 978 (89%) survivors who reported recent or past abuse as an adult by an intimate partner.

There were 935 survivors (85%) who reported abuse from their offender in the most recent domestic violence incident. Of these, most (87%) reported verbal abuse, followed by physical attack (60%), being threatened to be harmed or killed (34%), and physical restraint (29%). One-quarter (27%) were either held hostage (14%) or prevented from calling for help (13%). A lethal weapon was used in 12% of cases, and strangulation was involved in 11% of cases. Similarly, 11% of survivors reported being sexually abused/coerced, as well.

There were 820 survivors who reported being abused by an intimate partner in the past. Similar to the proportion of victims who reported abuse in the most recent incident, most victims who experienced past abuse from an intimate partner were verbally assaulted/degraded (83%), physically attacked (62%), or threatened (33%). Seventeen percent of those abused by an intimate partner in the past were sexually coerced, 15% respectively, were held hostage and threatened with a lethal weapon, and 14% respectively, were strangled and prevented from calling for help.

Of the 820 survivors who reported abuse by an intimate partner in the past, 807 (98%) reported abuse in the most recent domestic violence incident. Overall, there were 978 victims who reported abuse in a past or recent incident. Of these, 136 (14%) reported they or a partner were pregnant during the abuse.

## **6. Injury**

One-quarter (27%) of survivors reported being injured in a recent or past domestic violence incident. Females were almost three (2.6) times more likely (29%) than males (11%) to report being injured during a domestic violence incident.

Among races/ethnicities represented by at least 20 domestic violence survivors, Native Americans (56%) reported the most survivors who incurred injury from a domestic violence incident, followed by Black survivors (42%), survivors of "other" races (40%), White (non-Hispanic) survivors (26%), and Hispanic survivors (23%).

Survivors who ever experienced abuse from an intimate partner while they or their partner were pregnant, were two times (2.2) more likely to report having been injured in a domestic violence incident (52%), than survivors who reported they or their partner did not experience abuse while pregnant (24%).

Involvement in a domestic violence incident as an adult increases one's likelihood of injury in a subsequent domestic violence incident: three-quarters (77%) of those survivors who reported being injured in a domestic violence incident, reported being involved in a prior adult domestic violence experience.

Survivors who have been told they have a substance abuse problem, were almost two times (1.8) more likely to report being injured in a domestic violence incident (46%) than those who do not have a substance abuse problem (26%).

Survivors who have been told they have a mental illness, were almost two times (1.7) more likely to report being injured in a domestic violence incident (42%) than those who do not have a mental illness (25%).

## **7. Medical Treatment**

Of the 302 survivors who were injured, 44% (132) required medical treatment.

Over all, the rate of seeking medical treatment among injured survivors who required it, was quite high. Of the 132 injured survivors who required medical treatment, 83% (110) sought treatment.

Slightly more (87%) survivors with a substance abuse problem who needed treatment, sought treatment. Similarly, slightly more (84%) survivors with a mental illness who required treatment, sought treatment.

As mentioned earlier, female survivors were three times (29%) more likely to report being injured during a domestic violence incident than male survivors (11%). Of 294 female victims who were injured in a domestic violence incident, 129 (44%) required medical treatment. Of the 129 female survivors who required medical treatment, 85% (109) sought medical treatment.

A valid analysis on the proportion of males who required treatment and sought it was not possible in this dataset: of 75 male survivors, eight reported being injured during a domestic violence incident and only one required treatment, but did not get it.

Among races/ethnicities represented by at least 20 domestic violence survivors, Black survivors and "other" races (50%, respectively) reported the most survivors who required medical treatment, followed by Native American and White (non-Hispanic) survivors (45%, respectively), and Hispanic survivors (41%).

Among races/ethnicities represented by at least 20 domestic violence survivors, all (100%, respectively) Black survivors and "other" race survivors who required medical treatment, sought medical treatment. However, the number of survivors from these racial groups is very few so these findings should be viewed with caution. Ninety percent of White (non-Hispanic) survivors who required medical treatment sought it, followed by 82% of Native American survivors, and 81% of Hispanic survivors.

## **8. Children present**

Three-quarters (77% or 836) of survivors reported having children. When examined by gender, three-quarters (77%) of female survivors and 69% of male survivors have children.

Most survivors (29%) have two children. The mean number of children per survivor is 2.7. Male survivors had a slightly higher mean number of children (2.9) compared to females (2.7). Among races/ethnicities represented by 20 or more survivors, Native American survivors had the highest mean number of children (2.9), followed by Hispanic survivors (2.8), and White (non-Hispanic) survivors (2.5).

Of 841 survivors with children, 47% (398) reported that their children were present during the most recent domestic violence incident; and 40.5% (341) during a past domestic violence incident.

Survivors reported children present in a greater proportion of domestic violence incidents where the survivor lived with their abuser (53%), than incidents where survivors did not live with their abuser (41%).

There was a negligible difference in annual median income between survivors with children present during a domestic violence incident (\$12,000) and survivors where children were not present (\$10,872).

## **9. Children Abused**

Of 841 children present at domestic violence incidents, 20% (167) were abused by the survivor's abuser. Most children were verbally abused/degraded (69%), physically attacked (32%), threatened that they or loved ones would be harmed or killed (20%), or physically restrained (17%). Seventeen percent of children were either held hostage (10%) or prevented from calling for help (7%). Eight percent of children were sexually abused, 6% threatened with a lethal weapon, 5% strangled, and 4% threatened that their pets would be harmed or killed.

## **10. Children Injured**

Of 167 children present and abused in a domestic violence incident, 7% (12) were injured. Of 12 children injured, 3 (25%) required medical treatment. Of three children who required medical treatment, one obtained medical treatment.

## **11. Law Enforcement and Prosecution Involvement**

Sixty percent of survivors reported a domestic violence incident to law enforcement. Slightly more (64%) male survivors reported a domestic violence incident to law enforcement than female survivors (60%).

Slightly more survivors with children (61%) than survivors without children (56%) reported their domestic violence incident to law enforcement. There was negligible difference in a survivor's likelihood of reporting to law enforcement by their number of children, as those survivors who reported to law enforcement had an average 2.7 children and those who did not report had an average 2.8 children.

When examined by race/ethnicity, among races/ethnicities with 20 or more survivors, there were negligible differences in the proportion who reported a domestic violence incident to law enforcement. Slightly more Black and Native American survivors (67%, respectively) reported their incident to law

enforcement, followed closely by survivors of “other” races (65%), White (non-Hispanic) survivors (61%) and Hispanic survivors (60%).

Of the 40% of survivors who never reported a domestic violence incident to law enforcement, only 38 reported the reason they never reported. The greatest number of survivors stated that they did not report because they were *scared* (19), followed by those who did not report because they *believed that nothing would get done* (6), and because they *wanted to work out the relationship* (5). See Table B.

Table B. Why Survivors Never Reported a Domestic Violence Incident to Law Enforcement

<b>Reason</b>	<b>Total</b>
<b>Scared</b>	<b>19</b>
It would get worse/he would get mad/scared of what husband will do	5
Scared for my life	2
He threatened to kill me, my family and take my child	1
Scared because I’m not a citizen	1
Scared	10
<b>Family reasons</b>	<b>2</b>
<b>Wanted it to work out</b>	<b>5</b>
Thought he would change	1
Thought I could handle it	1
Wanted it to work out	3
<b>Didn’t think anything would get done</b>	<b>6</b>
They would just tell me to get an order of protection	1
Didn’t think law enforcement would understand emotional abuse	1
Didn’t think it was bad enough for the cops to do anything	1
Never got physical before	1
Just verbal/mental abuse	1
Non-violent	1
<b>Just wanted to get away</b>	<b>2</b>
<b>Didn’t want anyone else involved</b>	<b>1</b>
<b>Hiding own and perpetrators drug use from CYFD</b>	<b>1</b>
<b>Offender took my phone so I couldn’t call anyone</b>	<b>1</b>
<b>Mental illness (need professional help – not jail)</b>	<b>1</b>

One-quarter (26%) of survivors reported that they had been stalked by the abuser in a recent or past domestic violence incident. Of these 285 stalking survivors, 21% (60) reported the stalking to law enforcement.

When stalking was examined by race/ethnicity, a greater proportion of Black survivors (58%) were stalked by their abuser, followed by survivors of “other” races (40%), Native American survivors (39%), Hispanic survivors (24%) and White (non-Hispanic) survivors (23%).

Half (49%) of domestic violence survivors obtained a protection order for the most recent domestic violence incident. Males (81%) were almost two times (1.8) more likely than females (46%) to obtain a protection order for the most recent domestic violence incident.

Of the 628 survivors involved in a prior domestic violence incident as an adult, 20% (125) obtained an order of protection. With regard to prior domestic violence events, more females (20%) than males (12%) reported obtaining a protection order.

Of the 628 survivors who had a prior domestic violence incident, 12% (77) pressed charges. More female survivors (13%) pressed charges for a prior domestic violence incident than male survivors (3%). The number of survivors who pressed charges was too few to do a valid analysis by gender, race, or income.

## 12. Case Dispositions and Sentencing

Of 77 survivors who pressed charges, the case dispositions were reported for 43. Of these cases, 58% obtained a conviction (51% prosecuted and found guilty, and 7% pled to a lesser charge), 30% of cases were dismissed, 5% of cases were acquitted, and in 7% of cases the offender was given a diversion program.

Of the 25 survivors who pressed charges and obtained a conviction, 23 (92%) received a sentence that included jail time. The case sentencing was reported in 14 of these cases. Over half (56%, 8) were sentenced to 3 months or less, 14% ( 2) were sentenced to 6 months, 21% (3) were sentenced 15-18 months, and 7% (1) to two years. The mean jail sentence was 7.2 months.

## 13. Leave/Stay History

Almost two-thirds (60% or 656) of survivors reported that they left a violent relationship at some time. Of these, one-third (32% or 212) reported that they returned.

Of 212 survivors who returned to their abuser, 101 reported why they returned. Most mentions for returning to their abuser include: *returned to try to work it out* (63), *returned for the children* (27), and returned *because they were scared* (15). See Table C.

Table C. Why Survivors Returned to a Violent Relationship They Left

Reason	Total
<b>Tried to Work it Out</b>	<b>63</b>
I thought he loved me	1
Hope he/she would change/said he would change/said he would get help	28
Felt sorry for him	3
He was going to counseling	4
Wanted it to work out	12
Love/I loved him	12
Thought things would get better	3
<b>Returned for the Children</b>	<b>27</b>
She was pregnant	1
Financially dependent on him	1
Children miss him	1
Returned for the children	24
<b>Scared</b>	<b>15</b>
Fear on my own/no support/lack of resources	7
Intimidated to return	1

<b>Reason</b>	<b>Total</b>
Said he would kill me/feared for my life	2
He found me/he took me forcefully	2
Scared	3
<b>Family influence/pressure</b>	<b>1</b>
<b>He has complete control over me (financially, physically and mentally)</b>	<b>1</b>
<b>I was dumb/stupid</b>	<b>1</b>
<b>Don't know why I returned</b>	<b>2</b>

When examined by survivor income, there was negligible difference in the annual median income of survivors who left a violent relationship at some time (\$11,000) and those who did not leave (\$10,872). Conversely, there was a greater difference in the median income of those who left and stayed away and those who left and returned: survivors who left a violent relationship and did not return had a median annual income \$2,080 greater (\$12,000) than those who left and returned (\$9,920).

Of the 628 survivors who were involved in a prior domestic violence experience, 43% (268) reported that they live with an offender with whom they have a prior domestic violence incident.

When examined by income, survivors who live with an offender with whom they have a prior domestic violence experience had a median annual income \$2400 less (\$9,600) than survivors who do not live with an offender with whom they have a prior domestic violence experience (\$12,000).

#### **14. How Domestic Violence Survivors Hear About Service Providers**

Of 969 survivors who reported how they heard about the domestic violence service provider agency, most (23%) were referred by law enforcement or were self/voluntary referred (20%). Twelve percent of survivors had used a service provider before, 9% were referred by a friend, 6% by a relative, and 5% by the adult court system. See Table D.

Table D. How Survivors Hear About Domestic Violence Service Providers

<b>Source</b>	<b>Number of Survivors</b>	<b>Percent Survivors</b>
A Lawyer	6	1%
Adult Court System	52	5%
CYFD Juvenile Justice Division	1	0%
CYFD Protective Services	30	3%
Doctor/family practitioner	9	1%
Employer	4	0%
Family member/Relative	57	6%
Friend	92	9%
Juvenile Court System	2	0%
Law Enforcement Agency	221	23%
Other	130	13%
Probation or Parole	4	0%
Public service announcement on TV	37	4%
School	2	0%
Self or voluntary referral	194	20%
Through an Order of Protection	3	0%
Tribal Government/Agency	12	1%
Used it before	113	12%
<b>Total</b>	<b>969</b>	<b>100%</b>

## **APPENDIX B. DEFINITIONS**

Domestic violence incidence as determined by law enforcement include all incidents of assault, aggravated assault, battery, and aggravated battery as outlined in the “Crimes Against Household Members Act” as follows:

### **30-3-10. Short Title.**

This act (30-3-10 to 30-3-18 NMSA 1978) may be cited as the “Crimes Against Household Members Act”.

### **30-3-11. Definitions**

- A. As used in the Crimes Against Household Members Act (30-3-10 to 30-3-18 NMSA 1978), “household member” means spouse, former spouse, parent, present or former step-parent, present or former parent in-law, grandparent, grandparent-in-law, a co-parent of a child or a person with whom a person has had a continuing personal relationship. Cohabitation is not necessary to be deemed a household member for the purposes of the Crimes Against Household Members Act;
- B. “continuing personal relationship” means a dating or intimate relationship.

### **30-3-12. Assault against a household member.**

- A. Assault against a household member consists of:
  - (1) an attempt to commit a battery against a household member; or
  - (2) any unlawful act, threat or menacing conduct that causes a household member to reasonably believe that he is in danger of receiving an immediate battery.
- B. Whoever commits assault against a household member is guilty of a petty misdemeanor.

### **30-3-13. Aggravated assault against a household member.**

- A. Aggravated assault against a household member consists of:
  - (1) unlawfully assaulting or striking at a household member with a deadly weapon; or
  - (2) willfully and intentionally assaulting a household member with intent to commit any felony.
- B. Whoever commits aggravated assault against a household member is guilty of a fourth degree felony.

### **30-3-14. Assault against a household member with intent to commit a violent felony.**

- A. Assault against a household member with intent to commit a violent felony consists of any person assaulting a household member with intent to kill or commit any murder, mayhem, criminal sexual penetration in the first, second or third degree, robbery, kidnapping, false imprisonment or burglary.
- B. Whoever commits assault against a household member with intent to commit a violent felony is guilty of a third degree felony.

**30-3-15. Battery against a household member.**

- A. Battery against a household member consists of the unlawful, intentional touching or application of force to the person of a household member, when done in a rude, insolent or angry manner.
- B. Whoever commits battery against a household member is guilty of a petty misdemeanor.
- C. Upon conviction pursuant to this section, an offender shall be required to participate in and complete a domestic violence offender treatment or intervention program approved by the children, youth and families department pursuant to rules promulgated by the department that define the criteria for such programs.
- D. Notwithstanding any provision to the contrary, if a sentence imposed pursuant to this section is suspended or deferred in whole or in part, the period of probation may extend beyond three hundred sixty-four days but may not exceed two years. If an offender violates a condition of probation, the court may impose any sentence that the court could originally have imposed and credit shall not be given for time served by the offender on probation; provided that the total period of incarceration shall not exceed three hundred sixty-four days and the combined period of incarceration and probation shall not exceed two years.

**30-3-16. Aggravated battery against a household member.**

- A. Aggravated battery against a household member consists of the unlawful touching or application of force to the person of a household member with intent to injure that person or another.
- B. Whoever commits aggravated battery against a household member by inflicting an injury to that person that is not likely to cause death or great bodily harm, but that does cause painful temporary disfigurement or temporary loss or impairment of the functions of any member or organ of the body, is guilty of a misdemeanor.
- C. Whoever commits aggravated battery against a household member by inflicting great bodily harm or doing so with a deadly weapon or doing so in any manner whereby great bodily harm or death can be inflicted, is guilty of a third degree felony.
- D. Upon conviction pursuant to Subsection B of this section, an offender shall be required to participate in and complete a domestic violence offender treatment or intervention program approved by the children, youth and families department pursuant to rules promulgated by the department that define the criteria for such programs.
- E. Notwithstanding any provision to the contrary, if a sentence imposed pursuant to the provisions of Subsection B of this section is suspended or deferred in whole or in part, the period of probation may extend beyond three hundred sixty-four days but may not exceed two years. If an offender violates a condition of probation, the court may impose any sentence that the court could originally

have imposed and credit shall not be given for time served by the offender on probation; provided that the total period of incarceration shall not exceed three hundred sixty-four days and the combined period of incarceration and probation shall not exceed two years.

**30-7-17. Multiple convictions of battery or aggravated battery.**

- A. Whoever commits three offenses of battery against a household member as provided in Section 30-3-15 MNSA 1978 or aggravated battery against a household member as provided in Subsection B of Section 30-13-16 NMSA 1978, or any combination thereof, when the household member is a spouse, a former spouse, a co-parent of a child or a person with whom the offender has had a continuing personal relationship is guilty of a fourth degree felony.
- B. Whoever commits four or more offenses of battery against a household member as provided in Section 30-3-15 NMSA 1978 or aggravated battery against a household member as provided in Subsection B of Section 30-3-16 NMSA 1978, or any combination thereof, when the household member is a spouse, a former spouse, a co-parent of a child or a person with whom the offender has had a continuing personal relationship is guilty of a third degree felony.
- C. For the purpose of determining the number of offenses committed, each offense must have been committed after conviction for the preceding offense.

**30-3-18. Criminal damage to property of household member; deprivation of property of household member.**

- A. Criminal damage to the property of a household member consists of intentionally damaging real, personal, community or jointly owned property of a household member with the intent to intimidate, threaten, or harass that household member.
- B. Whoever commits criminal damage to the property of a household member is guilty of a misdemeanor, except that when the damage to the household member's interest in the property amounts to more than one thousand dollars (\$1000), the offender is guilty of a fourth degree felony.
- C. Deprivation of the property of a household member consists of intentionally depriving a household member of the use of separate, community or jointly owned personal property of the household member with the intent to intimidate or threaten that household member.
- D. Whoever commits deprivation of the property of a household member is guilty of a misdemeanor.

## Appendix C. Participating Law Enforcement Agencies 2017

<b>Police Department Name</b>	<b>Street Address</b>	<b>City</b>	<b>State</b>	<b>Zip Code</b>
Acoma Tribal Police Department	P.O. Box 468	Acoma	NM	87034
Albuquerque Police Department	400 Roma NW	Albuquerque	NM	87102
Angel Fire Police Department	3465 Mountain View Blvd.	Angel Fire	NM	87710
Anthony Police Department	P.O. Box 2663	Anthony	NM	88021
Artesia Police Department	702 W. Chisum	Artesia	NM	88210
Bayard Police Department	P.O. Box 788	Bayard	NM	88023
Belen Police Department	607 Becker Avenue	Belen	NM	87002
Bernalillo County Sheriff's Office	400 Roma NW	Albuquerque	NM	87102
Bernalillo Police Department	P.O. Box 638	Bernalillo	NM	87004
Bloomfield Police Department	915 North First St.	Bloomfield	NM	87413
Bosque Farms Police Department	P.O. Box 660	Peralta	NM	87042
Capitan Police Department	P.O. Box 246	Capitan	NM	88316
Carlsbad Police Department	405 S. Halagueno	Carlsbad	NM	88220
Carrizozo Police Department	P.O. Box 828	Carrizozo	NM	88301
Catron County Sheriff's Department	P.O. Box 467	Reserve	NM	87830
Chaves County Sheriff's Department	P.O. Box 1396	Roswell	NM	88201
Cibola County Sheriff's Department	115 W. High St.	Grants	NM	87020

**Appendix D. Law Enforcement Domestic Violence Data Collection Form**  
**Y17**

1. Agency Name \_\_\_\_\_
2. Quarter Reporting 1<sup>st</sup>  2<sup>nd</sup>  3<sup>rd</sup>  4<sup>th</sup>  Year: 2017
3. \_\_\_\_\_ Number of **Harassment** Incidents (30-3A-3.2)
- 3a. \_\_\_\_\_ Number of **Stalking** Incidents    3b. \_\_\_\_\_ Number of Stalking Incidents resulting in a homicide
4. \_\_\_\_\_ Number of **Domestic Violence** (DV) Incidents for the quarter (Based on offense incident reports)
- 4a. \_\_\_\_\_ Number of Domestic Violence Incidents resulting in a homicide
- 4b. \_\_\_\_\_ Total number of DV homicide victims ( \_\_\_\_\_ #female homicide victims    \_\_\_\_\_ # male homicide victims)
5. \_\_\_\_\_ Number of male DV victims    \_\_\_\_\_ Number of female DV victims    \_\_\_\_\_ Number DV victims gender unknown
6. Number of DV victims per age group                      Number of DV suspects per age group
 

_____ 0-6	_____ 0-6
_____ 7-12	_____ 7-12
_____ 13-18	_____ 13-18
_____ 19-25	_____ 19-25
_____ 26-35	_____ 26-35
_____ 36-45	_____ 36-45
_____ 46-55	_____ 46-55
_____ 56-65	_____ 56-65
_____ 66+    _____ # victims age unknown	_____ 66+    _____ # suspects age unknown
7. Number of DV victims per each race/ethnicity                      Number of DV suspects per each race/ethnicity
 

_____ Caucasian	_____ Caucasian
_____ Hispanic	_____ Hispanic
_____ Native American	_____ Native American
_____ Asian/Pacific Islander	_____ Asian/Pacific Islander
_____ Black	_____ Black
_____ Other    _____ # victim race/ethnicity unknown	_____ Other    _____ # suspect race/ethnicity unknown
8. \_\_\_\_\_ Number of DV male suspects    \_\_\_\_\_ Number of DV female suspects    \_\_\_\_\_ Number DV gender unknown
- 9a. \_\_\_\_\_ Number of domestic violence incidents involving injury
- 9b. Of **9a** incidents, how many involved: victim injury \_\_\_\_\_ suspect injury \_\_\_\_\_ police officer injury \_\_\_\_\_
10. Number of DV incidents with each type of injury: \_\_\_\_\_ B (apparent broken bone) \_\_\_\_\_ I (possible internal injury)  
 \_\_\_\_\_ L (severe laceration)                      \_\_\_\_\_ M (apparent minor injury)    \_\_\_\_\_ O (other major injury)  
 \_\_\_\_\_ T (loss of teeth)                              \_\_\_\_\_ U (unconscious)                      \_\_\_\_\_ Unknown
11. \_\_\_\_\_ Number of DV incidents a weapon was used
12. Number of DV incidents in which each type of weapon was used: \_\_\_\_\_ gun    \_\_\_\_\_ knife    \_\_\_\_\_ other
13. Number of each type of relationship of suspect/offender to victim. Suspect/Offender was a...  
 \_\_\_\_\_ spouse    \_\_\_\_\_ boyfriend    \_\_\_\_\_ ex-boyfriend    \_\_\_\_\_ relative    \_\_\_\_\_ gay partner  
 \_\_\_\_\_ ex-spouse    \_\_\_\_\_ girlfriend    \_\_\_\_\_ ex-girlfriend    \_\_\_\_\_ other    \_\_\_\_\_ gay ex-partner    \_\_\_\_\_ unknown
- 14a. \_\_\_\_\_ Number of DV incidents where alcohol/drugs were used.
- 14b. Number of DV incidents alcohol/drugs used by: \_\_\_\_\_ victim only    \_\_\_\_\_ suspect only    \_\_\_\_\_ both
15. \_\_\_\_\_ Number of DV *incidents* where children were at the scene
- 16a. \_\_\_\_\_ Total number of *children* at the scene of domestic violence incidents
- 16b. Number of children per each age group: \_\_\_\_\_ 0-5    \_\_\_\_\_ 6-9    \_\_\_\_\_ 10-12    \_\_\_\_\_ 13-17    \_\_\_\_\_ 18-21    \_\_\_\_\_ unknown
17. Number of DV incidents where: \_\_\_\_\_ total incidents with **no arrests** made;  
 \_\_\_\_\_ only *suspect* arrested;    \_\_\_\_\_ only *victim* arrested;    \_\_\_\_\_ both arrested;  
 \_\_\_\_\_ total incidents where suspect left the scene.    \_\_\_\_\_ total incidents for which a summons was issued.

## Appendix K. Participating Magistrate Courts

<b>Magistrate Court</b>	<b>City</b>	<b>Phone</b>
Catron County Magistrate Court	Reserve	(505) 533-6474
Catron County Magistrate Circuit Court	Quemado	(505) 773-4604
Chaves County Magistrate Court	Roswell	(505) 624-6088
Cibola County Magistrate Court	Grants	(505) 285-4605
Colfax County Magistrate Court	Raton	(505) 445-2220
Colfax County Magistrate Court	Springer	(505) 483-2417
Colfax County Magistrate Circuit Court	Cimarron	(505) 376-2634
Curry County Magistrate Court	Clovis	(505) 762-3766
De Baca County Magistrate Court	Fort Sumner	(505) 355-7371
Doña Ana County Magistrate Court	Las Cruces	(505) 524-2814
Dona Ana County Magistrate Circuit Court	Anthony	(505) 233-3147
Dona Ana County Magistrate Circuit Court	Hatch	(505) 267-3021
Eddy County Magistrate Court	Artesia	(505) 746-2481
Eddy County Magistrate Court	Carlsbad	(505) 885-3218
Grant County Magistrate Court	Bayard	(505) 537-3042
Grant County Magistrate Court	Silver City	(505) 538-3811
Guadalupe County Magistrate Court	Santa Rosa	(505) 472-3237
Guadalupe County Magistrate Circuit Court	Vaughn	(505) 584-2345
Harding County Magistrate Court	Roy	(505) 485-2549
Hidalgo County Magistrate Court	Lordsburg	(505) 542-3582
Lea County Magistrate Court	Eunice	(505) 394-3368
Lea County Magistrate Court	Hobbs	(505) 397-3621
Lea County Magistrate Circuit Court	Jal	(505) 395-2740
Lea County Magistrate Court	Lovington	(505) 396-6677
Lea County Magistrate Court	Tatum	(505) 398-5300
Lincoln County Magistrate Court	Carrizozo	(505) 648-2380
Lincoln County Magistrate Court	Ruidoso	(505) 378-7022
Los Alamos County Magistrate Court	Los Alamos	(505) 662-2727

<b>Magistrate Court</b>	<b>City</b>	<b>Phone</b>
Luna County Magistrate Court	Deming	(505) 546-9321
McKinley County Magistrate Court	Gallup	(505) 722-6636
McKinley County Magistrate Court	Thoreau	(505) 862-7871
Mora County Magistrate Court	Mora	(505) 387-2937
Otero County Magistrate Court	Alamogordo	(505) 437-9000
Quay County Magistrate Court	Tucumcari	(505) 461-1700
Quay County Magistrate Court	San Jon	(505) 576-2591
Rio Arriba County Magistrate Circuit Court	Chama	(505) 756-2278
Rio Arriba County Magistrate Court	Espanola	(505) 753-2532
Roosevelt County Magistrate Court	Portales	(505) 356-8569
San Juan County Magistrate Court	Aztec	(505) 334-9479
San Juan County Magistrate Court	Farmington	(505) 326-4338
San Miguel County Magistrate Court	Las Vegas	(505) 425-5204
Sandoval County Magistrate Court	Bernalillo	(505) 867-5202
Sandoval County Magistrate Court	Cuba	(505) 3519
Santa Fe County Magistrate Court	Santa Fe	(505) 984-9914
Santa Fe County Magistrate Circuit Court	Pojoaque	(505) 455-7938
Sierra County Magistrate Court	T or C	(505) 894-3051
Socorro County Magistrate Court	Socorro	(505) 835-2500
Taos County Magistrate Court	Taos	(505) 758-4030
Taos County Magistrate Circuit Court	Questa	(505) 586-0761
Torrance County Magistrate Court	Moriarty	(505) 832-4476
Torrance County Magistrate Circuit Court	Estancia	(505) 384-2926
Union County Magistrate Court	Clayton	(505) 374-9472
Valencia County Magistrate Court	Belen	(505) 864-7509
